Physics MCQ: perfect 12/12 on all 7 physics exams (84/84, 100% all-time). Subject average now 94.5% (430.0/455, 7 exams) — just ahead of Mathematics (94.4%), making Physics her strongest subject.

Strengths on This Attempt

- Perfect 12/12 MCQ — restarts the perfect-MCQ run; physics 84/84 all-time (100%)
- All four Section C long questions (every OR variant) fully correct
- Numerical work faultless: acceleration, impulse, moments, Hooke's law, orbital speed, hydrostatics
- Direction-aware (displacement north-east; impulse/force sign explained)
- Highest physics score to date; near-flawless paper

Priority Revision Targets

- **State the relationship, not just the number:** for "what if the speed is doubled", write KE ∝ v² so KE becomes 4× greater. That one line was the only mark lost.
- **Re-check intermediate arithmetic:** some 2πr products were miswritten mid-working; every final answer was still correct, but a quick line-by-line glance back removes the risk.
