Section Breakdown

Section A (MCQs) 11/12 (91.7%)

Section B (Short Ans.) 32/33 (97.0%)

Section C (Long Ans.) 20/20 (100%)

Per-Question Marks

Q	Variant	Topic	Awarded	Max	Note
A.1-12	MCQ	All 12 multiple choice questions	11	12	Q.12 quadrant of (−x,y) missed — chose Second instead of First
2(i)	OR	Fabric cost per yard	3	3	139.2 ÷ 3.2 = Rs. 43.50
2(ii)	Main	Balloon total cost	3	3	42 × 1.85 = Rs. 77.70
2(iii)	OR	Average speed & reasonableness	3	3	17.49 km/l, reasonable
2(iv)	OR	Antilog of 3.5636 & 2.9281	3	3	3661 and 847.4
2(v)	Main	Kalma Pak timing in days	2	3	57.86 correct but rounded UP to 58 (should round down to 57); no standard form
2(vi)	OR	Factorize $2x^2-5x-3$	3	3	$(2x+1)(x-3)$
2(vii)	OR	HCF of two trinomials	3	3	HCF = $(x+3)$
2(viii)	OR	Absolute value equation	3	3	$z = 8/3, 4/3$
2(ix)	Main	Compound inequality	3	3	$x<-5$ or $x>-1$
2(x)	OR	Rectangle missing vertices	3	3	A(0,0), C(−4,2)
2(xi)	Main	Midpoint — find C	3	3	C = (−5,10)
3(i)	Main	log(63/20) & digits in 6^{45}	5	5	0.4983; 36 digits
3(ii)	OR	Machine surface area	5	5	$(5x-3)^2$, all 4 parts
3(iii)	Main	Double inequality & abs. value	5	5	$-17/3 \le x \le 4/3$; $y=\pm 9/5$
3(iv)	OR	Rhombus proof (distance formula)	5	5	4 sides = $\sqrt{13}$, diagonals 6 & 4

Math MCQ record rises to 117/120 across all 10 attempts (97.5%), 3 errors total (exam-07, exam-13, exam-14). Subject average rises to **94.3% (613.0/650, 10 attempts)**, narrowing the gap to Chemistry (94.5%) to 0.2 points, still trailing Physics (94.8%).

Strengths on This Attempt

- Perfect Section C (20/20) — the best long-question result of the four exam-11-through-14 papers on this exact syllabus.
- 10 of 11 Section B questions and all 4 Section C questions scored full marks with clean, complete working.
- Every multi-part question (machine surface area (a)-(d), double inequality + absolute value, 8-distance rhombus proof) finished in full — no incomplete sub-parts anywhere.
- Both antilog lookups and the HCF-by-factorization question executed with textbook precision.

Priority Revision Targets

- **Rounding-direction instructions (−1 mark):** Q.2(v) computed 57.86 days correctly but rounded to 58 instead of DOWN to 57 as the question specifically asked, and never wrote the requested standard-form figure. Treat "round down" as floor, not nearest-integer rounding.
- **Re-verify each MCQ sign fresh (−1 mark):** Q.12 answered "Second quadrant" again right after Q.11's genuine Second-quadrant answer, instead of re-deriving the sign of −x for the new question.
