Physics MCQ: perfect 12/12 on all 6 physics exams (72/72, 100% all-time). Subject average: 93.7% (365.5/390, 6 exams).

Strengths

- 10th consecutive perfect MCQ | physics MCQ 72/72 all-time (100%)
- Full P = rho x g x h derivation with all intermediate steps (5/5)
- Conservation of energy with textbook-level law statement and clean algebra (5/5)
- Direction-aware impulse and momentum calculation
- Hooke's law, pressure definition, power definition: all faultless
- All 5 scientific method steps in correct order

Priority Revision Targets

- **Sanity-check numerical answers:** d = 60 cm is impossible on a half-metre arm. 6 x 20 = 120, so 120 / 6 = 20, not 60
- State direction for all vector answers (displacement, momentum, velocity)
- Re-read every question fully after finishing; tick each lettered sub-part before moving on
- Write the verbal law statement before the formula in Section C
- If a question says "calculate", write the number, not just the formula
