Section Breakdown

Section	Description	Score	%	Marks Lost
A	MCQs (12 × 1) — Chemistry branches, matter basics, allotropy, solutions	11 / 12	91.7 %	1
B	Short Answers (11 × 3) — Green chemistry, states of matter, allotropes, solutions, colloids	33 / 33	100 %	0
C	Long Answers (4 × 5) — Branches, states of matter, classification, solutions comparison	20 / 20	100 %	0
Total	Chemistry — exam-01-ch1-2 (Version 1)	64 / 65	98.5 %	1

Detailed View

Chemistry — exam-01-ch1-2

64 / 65 (98.5 %) Grade A+

Ch 1 (Nature of Chemistry) · Ch 2 (Matter) · 12 April 2026

11 / 12

SECTION A · 91.7 %

33 / 33

SECTION B · 100 %

20 / 20

SECTION C · 100 %

64 / 65

TOTAL · 98.5 %

Strengths

- **Perfect subjective score (53/53)** — every definition, comparison, and example is accurate
- **Excellent comparison tables** — Compound vs Mixture, Saturated vs Unsaturated, Colloid vs Suspension, Solution/Colloid/Suspension
- **Strong matter concepts** — states, macroscopic properties, allotropy, classification flowchart all comprehensive
- **Chemistry branches** — all five defined with relevant daily-life applications
- **Flowchart quality** — classification of matter diagram shows full hierarchy down to solution types

Areas to Improve

- **Forensic chemistry (MCQ 5):** it is an application of **analytical chemistry**, not environmental. Analytical = identifying unknown substances through examination — **-1**
- **Chemical formulas:** wrote “O” instead of O₂, “H” instead of H₂, and “Carbondioxide (O₂)” instead of CO₂. Not penalised this time, but examiners may deduct in board exams
- **Content overlap:** plasma described identically in Q.2(v) and Q.2(vi) OR — add new detail when covering the same topic across questions

All Exam Results to Date

Subject	Exam	Date	Section A	Section B	Section C	Total	%
Biology	exam-01-ch1-6	3 Apr	12 / 12	28 / 33	12 / 20	52 / 65	80.0 %
Physics	exam-01-ch1-2	7 Apr	12 / 12	32.5 / 33	19 / 20	63.5 / 65	97.7 %
Physics	exam-02-ch3-4-9	10 Apr	12 / 12	30.5 / 33	19.5 / 20	62 / 65	95.4 %
Chemistry	exam-01-ch1-2	12 Apr	11 / 12	33 / 33	20 / 20	64 / 65	98.5 %

Key Takeaways

- **Highest score yet** — 64/65 (98.5%) is the best result across all four exams in any subject.
- **First perfect subjective score** — 53/53 on Sections B + C; no marks lost on any written answer.
- **MCQ mastery across subjects** — 47/48 total MCQs correct (98%) across all four exams. The one MCQ error here (forensic = analytical) is a factual recall slip, not a conceptual gap.
- **Massive improvement from Biology** — jumped from 80% (first exam) to 98.5% (latest), showing rapid adaptation to the exam format and deeper preparation.
- **Consistent A+ trajectory** — Physics and Chemistry scores are all 95%+, indicating strong command of science subjects.

Things to Fix Before the Next Exam

- **Memorise forensic = analytical chemistry:** Forensic chemistry uses analytical methods (examining traces, identifying unknowns). Environmental chemistry deals with pollutants and ecosystems — different focus.
- **Diatomic element formulas:** Always write H₂, O₂, N₂, Cl₂, F₂, Br₂, I₂ (the “7 diatomics”). Never write just H, O, or N for the gaseous element.
- **Molecular formula accuracy:** Carbon dioxide = CO₂ (one carbon, two oxygens). Double-check every formula before moving on.
