TESTS TAKEN

92.9 %

AVERAGE SCORE

98.5 %

HIGHEST (CHEMISTRY)

80.0 %

LOWEST (BIOLOGY)

Attempts Log (chronological)

#	Date	Subject	Exam	Score	%	Grade
1	3 Apr 2026	Biology	exam-01-ch1-6	52 / 65	80.0 %	A
2	7 Apr 2026	Physics	exam-01-ch1-2	63.5 / 65	97.7 %	A+
3	10 Apr 2026	Physics	exam-02-ch3-4-9	62 / 65	95.4 %	A+
4	12 Apr 2026	Chemistry	exam-01-ch1-2 NEW	64 / 65	98.5 %	A+

Subject Performance

Chemistry — exam-01-ch1-2 **NEW**

64 / 65 (98.5 %) Grade A+

Ch 1 (Nature of Chemistry) · Ch 2 (Matter) · 12 April 2026

11 / 12

SECTION A · 91.7 %

33 / 33

SECTION B · 100 %

20 / 20

SECTION C · 100 %

64 / 65

TOTAL · 98.5 %

Strengths

- **Perfect subjective score (53/53)** — first time across all exams
- Excellent comparison tables and classification flowchart
- All five chemistry branches with daily-life applications
- Matter concepts, allotropy, and solution types all comprehensive

Areas to Improve

- **MCQ 5:** forensic chemistry = **analytical**, not environmental — **-1**
- Chemical formulas: wrote O instead of O₂, H instead of H₂, CO₂ as "O₂"
- Avoid repeating identical plasma text across two questions

Physics — exam-02-ch3-4-9

62 / 65 (95.4 %) Grade A+

Unit 3 (Dynamics-I) · Unit 4 (Dynamics-II) · Unit 9 (Nature of Science) · 10 April 2026

12 / 12

SECTION A · 100 %

30.5 / 33

SECTION B · 92.4 %

19.5 / 20

SECTION C · 97.5 %

62 / 65

TOTAL · 95.4 %

Strengths

- Perfect MCQs (12/12), strong dynamics & equilibrium
- Flawless numericals: momentum, hammer throw, orbital speed
- First-principles derivations: impulse-momentum, $v^2 = GM/r$

Areas to Improve

- **Arithmetic check:** $9600/5 = 1920$ N, wrote 1020 — **-0.5**
- **Terminal velocity:** missed drag-equals-weight — **-1.5**
- **Equilibrium def:** define the term itself first — **-0.5**
- **Momentum form:** use $m_1v_{1i} + m_2v_{2i} = \dots$ — **-0.5**

Physics — exam-01-ch1-2

63.5 / 65 (97.7 %) Grade A+

Unit 1 (Physical Quantities & Measurement) · Unit 2 (Kinematics) · 7 April 2026

12 / 12

SECTION A · 100 %

32.5 / 33

SECTION B · 98.5 %

19 / 20

SECTION C · 95 %

63.5 / 65

TOTAL · 97.7 %

Strengths

- Perfect MCQs, strong conceptual grasp
- Clean numericals: Maglev, Shoaib Akhtar, free fall
- Effective diagrams: target boards, graphs, vernier caliper

Areas to Improve

- **Formula direction:** $a = (v_f - v_i)/t$ instead of $(v_f - v_i)/t$ — **-0.5**
- **Numerical completeness:** LC formula given but didn't compute $1/20 = 0.05$ mm — **-1**

Biology — exam-01-ch1-6

52 / 65 (80.0 %) Grade A

Ch 1 (Science of Biology) → Ch 6 (Molecular Biology) · 3 April 2026

12 / 12

SECTION A · 100 %

28 / 33

SECTION B · 84.8 %

12 / 20

SECTION C · 60 %

52 / 65

TOTAL · 80 %

Strengths

- Perfect MCQs (12/12)
- Biological method (Laveran, malaria) well explained
- Strong molecular biology: RNA types, central dogma
- Good comparison tables: prokaryotic vs eukaryotic

Areas to Improve

- **Time management:** Q.5 in Section C not attempted — -5
- **Terminology:** alpha helix, beta pleated sheet, A-T/G-C base pairing
- **Table-header errors:** swapped polysaccharide/disaccharide columns
- **Ring structure:** purines (double, big) vs pyrimidines (single, small)
- **Specific examples:** Linnaeus dates, female *Anopheles*

Subject Trend (per attempt)

Subject	Attempts	Latest Score	Average	Trend
Chemistry	1	98.5 % (12 Apr · exam-01)	98.5 %	— baseline
Physics	2	95.4 % (10 Apr · exam-02)	96.5 %	▼ -2.3 pts (vs exam-01)
Biology	1	80.0 % (3 Apr · exam-01)	80.0 %	— baseline

Physics dip is small and traceable to one arithmetic slip (-0.5) and one incomplete terminal-velocity answer (-1.5).

Pending Assessment

Exams prepared but not yet attempted:

- **Chemistry:** exam-02-ch3-5 (Atomic Structure, Periodic Table, Chemical Bonding)
- **Mathematics:** exam-01-ch1-2 (Real Numbers, Logarithms), exam-02-ch3-5 (Sets & Relations, Factorization, Linear Equations & Inequalities)
- **Physics:** exam-03 onwards (Units 5-8) — not yet created
- **Biology:** no new exam beyond exam-01-ch1-6 yet

No exams created yet for: English · Urdu · Islamiat · Pak Studies

Overall Assessment

Consistent Strengths Across All Subjects

- **MCQ mastery** — 47 / 48 across all four exams (98%). Strong conceptual foundation everywhere.
- **Structured writing** — clear definitions, step-by-step working, effective tables and diagrams.
- **Numerical and derivation work** — Physics numericals are essentially flawless; first-principles derivations come naturally.
- **Rapid improvement** — from 80% (Biology, first exam) to 98.5% (Chemistry, latest). Format adaptation and exam discipline improved dramatically.
- **Chemistry debut** — first-ever Chemistry exam scored the highest across all subjects. Perfect 53/53 on subjective questions.

Priority Weak Areas

- **Time management in Section C** — still relevant from Biology exam-01 (Q.5 not attempted, lost 5 marks). Physics and Chemistry Section C are now strong areas, so the discipline transfers — keep it up.
- **Arithmetic checking** — new pattern in Physics exam-02 ($9600/5 = 1920$, wrote 1020). Always reverify the final division step.
- **Chemical formula precision** — diatomic elements must be H_2 , O_2 , N_2 . Molecular formulas (CO_2 not O_2) must be double-checked.
- **Terminology completeness** — terminal velocity answer missed the core sentence. Precise terminology in Biology (alpha helix, base-pairing rules). Memorise the *core sentence* for each definition.
- **Precise definitions in open answers** — when a question asks “state the conditions”, first define the umbrella term (e.g. equilibrium) before listing conditions.

Study Recommendations

- **Time discipline drill:** practice full 2h 30min papers under timer; always leave 20 minutes for the last long question.
- **Formula card:** make a one-page card of all diatomic elements + key molecular formulas. Review before each Chemistry exam.
- **Two-pass arithmetic:** on every numerical, recompute the final division/multiplication step before writing the answer.
- **Core sentence method:** for every key term, memorise one canonical sentence (e.g. “Drag force grows with speed until it equals the weight; then $F_{\text{net}} = 0$ and $a = 0$, so velocity stays constant.”)
- **Next priority:** attempt Chemistry exam-02 (Ch 3-5) and Mathematics exams to widen the performance baseline.
