

Biology — Exam 02 — Chapter 7: Metabolism

SINGLE ATTEMPT OVERVIEW

Seemab | Annual Examination 2026 | Federal Board (FBISE) SSC-I | Date: 30 April 2026

TOTAL SCORE

60.5 / 65

PERCENTAGE

93.1%

GRADE

A

MCQ SCORE

12 / 12

Section Breakdown

Section A — MCQs

12 / 12

100%

Section B — Short (11 Qs)

30.5 / 33

92.4%

Section C — Long (4 Qs)

18 / 20

90.0%

Subject Performance Card — Biology exam-02-ch7

Strengths

- 7th consecutive perfect MCQ score (12/12)
- ATP structure — all 3 components + adenosine formation chain
- Glycolysis — "(net)" qualifier used spontaneously for ATP yield
- Inhibition Q3(ii) — competitive + non-competitive with examples (sulfonamide, cyanide, heavy metals)
- Anaerobic importance — all 4 reasons correct from memory
- Calvin cycle — correct sequence, credited Melvin Calvin
- Q3(iv) aerobic vs anaerobic — full 5/5: comparison table, glycolysis as common stage, both anaerobic fates (yeast + muscle), all 3 aerobic stages with 36 ATP
- Competitive inhibition — correctly stated "similarity in shape or structure to substrate"
- Full completion: all 4 Section C questions attempted

Areas for Improvement

- Enzyme specificity mechanism — always link specificity to active-site unique shape (lock-and-key), not just state that enzymes are specific
- Non-competitive inhibition — name the allosteric site explicitly as the binding location; "not at the active site" is necessary but not sufficient
- ETC location — "inner mitochondrial membrane" must be stated when listing 4 stages of aerobic respiration
- "Increase rate of reaction" as a distinct characteristic — state quantitative claim (millions of times faster) as its own named point
- Overall balanced equation in Q3(iii) — $6\text{CO}_2 + 12\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{H}_2\text{O} + 6\text{O}_2$ must be written explicitly in the long photosynthesis answer (not just in prose)

Comparison — Biology Attempts

Exam	Date	Score	%	MCQ	Sec B	Sec C	Grade	Notes
exam-01-ch1-6	3 Apr 2026	52/65	80.0%	11/12	~26/33	~15/20	A	Q.5 Sec C not attempted; MCQ error on Q5
exam-02-ch7	30 Apr 2026	60.5/65	93.1%	12/12	30.5/33	18/20	A	All sections complete; streak to 7 perfect MCQs

Biology subject average now: 86.55% (2 exams: 80.0% + 93.1%)

Key improvement: time management issue resolved (all 4 long questions answered). MCQ error not repeated. +13.1 percentage points jump from exam-01.
