Records

BEST SCORE Math exam-01 — 65/65 (100%) First-ever perfect score, 18 April 2026. All 12 MCQs + all Section B + all Section C perfect.	LOWEST SCORE Biology exam-01 — 52/65 (80.0%) 3 April 2026. Q.5 Section C not attempted due to time. MCQ error on Q5 (environmental vs analytical).	MCQ RECORD 95/96 (99.0%) — 7 consecutive 12/12 Only error: Bio exam-01 Q5. Exams 2 through 8: 7 consecutive perfect MCQ rounds. Record still live.
--	--	--

Recurring Patterns

Consistent Strengths - MCQ mastery — 99.0% across 96 MCQs; 7 perfect rounds in a row - Definitions and formulas — textbook-level precision across all subjects - Tabular layouts — used consistently and cleanly - Time management — resolved since Bio exam-01; all sections complete in exams 2-8 - Verification discipline — Math exam-01 Q2(v) substitution check - Net qualifier in calculations — e.g., "2 ATP net" in glycolysis (Bio exam-02) - Daily-life examples — inhibition examples (Bio exam-02 Q3ii): sulfonamide, cyanide, heavy metals - Hard question types handled cleanly — Calvin cycle sequence, four-stage respiration equations, aerobic vs anaerobic comparison table - Shape similarity stated for competitive inhibition (Bio exam-02 Q2v) — correct structural link made	Recurring Weaknesses (2+ exams) Mechanism behind concepts (Biology): States facts but omits the "why" — e.g., enzyme specificity stated without linking to active-site unique shape (Bio exam-02 Q2ii). Watch for this pattern on any Biology short answer requiring mechanistic explanation. Allosteric site naming (Biology, first occurrence Bio exam-02): Bio exam-02 Q2(v) — non-competitive inhibition described as "not at active site" but allosteric site not explicitly named. First occurrence; watch for next Biology exam. Location of ETC not named (Biology): Bio exam-02 Q2ix — "inner mitochondrial membrane" missing. First occurrence; watch for next Biology exam. Parentheses discipline when squaring grouped symbols (Math): Math exam-03 Q2(iii)(or) — $(2x)^2$ written as $2x^2$. First noted 22 Apr 2026. Number-line sketch on inequalities (Math): Exam-03 Q3(iii) — correct solution set but no number-line drawn. 1 mark lost. Overall balanced equation in long Biology answers: Bio exam-02 Q3(iii) — $6\text{CO}_2 + 12\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{H}_2\text{O} + 6\text{O}_2$ must be written explicitly; stating in prose is not enough.

Score Trajectory

Exam #	Subject	Score	%	Trend vs prior same subject
1	Biology	52/65	80.0%	—
2	Physics	63.5/65	97.7%	—
3	Physics	62/65	95.4%	-2.3% vs prior Physics
4	Chemistry	64/65	98.5%	—

5	Chemistry	59.5/65	91.5%	-7.0% vs prior Chemistry
6	Math	65/65	100%	—
7	Math	60.5/65	93.1%	-6.9% vs prior Math
8	Biology CORRECTED	60.5/65	93.1%	+13.1% vs prior Biology (exam-01: 80%)

Biology is the only subject to show improvement on second attempt (+13.1%). Physics and Math remain above 93% on both attempts. Chemistry exam-02 drop linked to Periodic Trends (known weak area).

Version history: v1 (2026-04-03, Bio-01) → v2 (2026-04-10, Phys-01) → v3 (2026-04-12, Chem-01) → v4 (2026-04-17, Chem-02) → v5 (2026-04-18, Math-01) → v6 (2026-04-22, Math-03) → v7 (2026-04-30, Bio-02 corrected) — this version
