MCQ Record Analysis			
Exam	MCQ Score	Any Error?	Detail
Bio exam-01	11/12	Yes	Q5 — Forensic biology = analytical, not environmental
Physics exam-01	12/12	No	Perfect
Physics exam-02	12/12	No	Perfect
Chem exam-01	12/12	No	Perfect

Chem exam-02	12/12	No	Perfect
Math exam-01	12/12	No	Perfect
Math exam-03	12/12	No	Perfect
Bio exam-02 (Apr)	12/12	No	Perfect
Bio exam-02 (May re-sit)	12/12	No	Perfect — 8th consecutive
Chem exam-03 NEW	12/12	No	Perfect — 9th consecutive
TOTAL	119/120	1 error (Bio-01 only)	99.2% MCQ accuracy overall

Achievement Milestones

- **2026-04-18:** First ever perfect score — Math exam-01 (65/65, 100%)
- **2026-05-02:** Second perfect score — Biology exam-02 Ch7 re-sit (65/65, 100%)
- **2026-05-02:** 8 consecutive perfect MCQ scores (Physics-01 through Bio-02 re-sit)
- **2026-05-12:** 9th consecutive perfect MCQ score — Chem exam-03 (MCQ record now 119/120)
- **2026-05-12:** Chemistry subject average rises to 95.6% (was 95.0% after 2 exams)
- **Trajectory:** Overall average climbed from 80.0% (after attempt 1) to 94.5% (after attempt 10)
- **No score below 91.5%** across the last 9 consecutive exams (since Bio exam-01)

CONSISTENT STRENGTHS

- MCQ mastery — 99.2% accuracy (119/120)
- Definitions and formulas — textbook precision
- Tabular comparison layouts — always clean
- Mechanism-behind-concepts (now consistent in Biology)
- Complete coverage — no sub-part left unanswered (last 9 exams)
- Verification discipline in Math (substitution checks)
- Location-naming in Biology — corrected and consistent
- Mass-mole interconversions — now automatic and reliable
- Ionic formula derivation (cross-charge rule) — solid

ACTIVE WEAKNESS PATTERNS (WATCH LIST)

- **Ionic equation notation (Chemistry):** Ion charges (H^+ , Cl^- , Mg^{2+}) and (aq) state symbols absent — 2nd occurrence (Q2(ix) + Q3(iii) this exam). Needs targeted drill.
- **Net ionic products (Chemistry):** " $Mg+H_2\rightarrow MgH_2$ " — H_2 is released as gas, not bonded. New pattern — watch in next exam.
- **atoms = moles $\times$ NA not M $\times$ NA (Chemistry):** Fundamental chain error in Q3(iv). New occurrence.
- **Math: $(2x)^2\rightarrow 4x^2$:** Must write as $4x^2$, not $2x^2$; grouping symbol squaring — flagged since exam-03 Apr.
- **Math: Number-line sketch for inequality solution sets** — flagged since exam-03 Apr.
- **Elemental molar masses:** C=12, N=14 confusion — new occurrence (carbon used as 14).
- **Aspirin empirical formula check:** GCD of 9,8,4 = 1 — formula already simplest. New occurrence.
