Recurring Weakness (flagged across 6 consecutive exams)

- "Stops before completing all required sub-parts" — accounts for the majority of marks lost in every recent paper across all subjects.
- Specific gaps this paper: Alphonse Laveran (Ch 1), homeostasis feedback sequence (Ch 5), pentose sugars in nucleotides (Ch 6), polysaccharides (Ch 6), archaebacteria types (Ch 2), chromatin/genome (Ch 3).
- Action: Before attempting each question, list every sub-part and tick off each one before moving on.
