

Seemab — Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts
Version 26 | Updated: 30 Jun 2026 | 22 attempts across 4 subjects

CORRECTION IN THIS VERSION (v26): Chemistry exam-13-ch1-9 (2026-06-30) is corrected from 62.5/65 (96.2%) to 60.5/65 (93.1%). Q3(iii)(b) — oxidation states of S in H₂SO₄ and N in HNO₃ — was not attempted (confirmed at 300 DPI; 0/2). The original report incorrectly described working that does not exist on the scan. Chemistry subject average corrects from 93.5% (364.5/390) to 93.3% (364.0/390). Overall average corrects from 93.0% (1330/1430) to 92.9% (1328/1430). v25 is retained unchanged per the strictly-additive rule.

18	24 Jun 2026	Chemistry	exam-12-ch1-9	62.5/65	96.2%	12/12	A+
19	25 Jun 2026	Physics	exam-07-ch1-6-9	58.5/65	90.0%	12/12	A+
20	26 Jun 2026	Math	exam-10-ch1-2-4-5-7-10	61/65	93.8%	12/12	A+
21	29 Jun 2026	Biology	exam-08-ch1-7	54.5/65	83.8%	12/12	A
22	30 Jun 2026	Chemistry	exam-13-ch1-9 CORRECTED	60.5/65	93.1%	12/12	A+

Row 22 highlighted — corrected in this version (v26). Previous version (v25) carried 62.5/65; v25 is retained unchanged.

Best Scores

- Highest single: 65/65 (100%) — three-way tie: Math exam-01, Bio exam-02 re-sit, Physics exam-03

Lowest / Needs Attention

- Lowest single: 52/65 (80.0%) — Bio exam-01-ch1-6
- Weakest subject: Biology at 90.3%

- Best subject: Mathematics at 94.6%
- MCQ record: 262/264 (99.2%) all-time
- Consecutive perfect MCQs: 9 exams ongoing (exams 14–22)
- Chemistry MCQ: perfect in all 6 papers (72/72)
- Physics MCQ: perfect in all 5 papers (60/60)
- Math MCQ: perfect in all 5 papers (60/60)
- Biology last two papers: 88.5% and 83.8% — trending down; photosynthesis and enzyme kinetics need immediate review
- Chemistry exam-13 (this correction): 93.1% — still A+ but 3.1pp below exam-12; loss is concentrated in one question (Q3(iii)(b) not attempted)

Recurring Weakness — Active and Escalating (flagged across 8 consecutive exams)

- "Stops before completing every required sub-part" — now confirmed across 8 consecutive exams in all four subjects. This correction adds another instance: Q3(iii)(b) in Chem exam-13 (oxidation states of S and N) was not attempted at all, costing 2 marks — the single largest loss in the paper.
- **Chemistry specific:** Q2(x) thermochemical equations omitted in both exam-12 and exam-13 (same question structure, same 1mk loss each time). Q3(i)(a) Dalton's limitation omitted in exam-13. Q3(iii)(b) oxidation state assignment omitted entirely in exam-13.
- **Biology:** exam-07 and exam-08 both dipped below 90%; photosynthesis and enzyme kinetics need immediate review.
- **Drill fix:** Before moving to the next question, re-read the full question text and explicitly tick every sub-part and instruction keyword (especially "find", "state", "show working").
