Strong Areas

Fully digitized and exam-ready:

- **Biology** — all 10 chapters extracted, OCR'd, and compressed; 1 exam covering chapters 1-6
- **Chemistry** — all 12 chapters extracted, OCR'd, and compressed; 2 exams covering chapters 1-5
- **Physics** — all 9 units extracted, OCR'd, and compressed; 2 exams covering Units 1-4 and Unit 9

Gaps to Close

Missing textbooks (no material available):

- **Urdu** — no book uploaded yet
- **Islamiat** — no book uploaded yet
- **English** — only a partial file (Ch 1-3); needs the complete book

Math textbook is truncated:

- Current whole-book.pdf contains only **Units 1-5** out of 11
- Missing: Unit 6 (Trigonometry & Bearing), Unit 7 (Coordinate Geometry), Unit 8 (Geometry of Straight Lines), Unit 9 (Geometry & Polygons), Unit 10 (Practical Geometry), Unit 11 (Basic Statistics), Answers, Log Tables

- Cannot generate exams for Units 6-11 until the full book is available

Exam coverage gaps in digitized subjects:

- **Biology** — no exams for Ch 7-10 yet (Metabolism, Plant Physiology, Reproduction, Evolution)
- **Chemistry** — no exams for Ch 6-12 yet (Stoichiometry through Environmental Chemistry)
- **Physics** — Units 5, 6, 7, 8 not yet covered by any exam
- **Math** — Units 6-11 cannot be covered (book is truncated)

Suggested Next Steps

1. Upload the full **Math textbook** to replace the truncated file (Units 6-11 + answers)
2. Upload **English, Urdu, and Islamiat** textbooks so the same OCR + exam pipeline can run
3. Generate exams for the uncovered chapters in Biology, Chemistry, and Physics
4. Create revision notes for chapters already covered in exams
