PERFECT PAPERS

100% scores

Three sessions marked in parallel on the night of 13–14 September, and the last two cumulative versions each landed before all the marking was finished: v58 carried only Islamiat (the Quran attempt wasn't visible yet), and v59 added Tarjuma-tul-Quran but at its provisional first-pass score, and had no Biology exam-16 at all. **This version, v60, is the first to carry all three 13 September attempts in their final, deep-checked form:**

Tarjuma-tul-Quran exam-01 corrected from 42 to 43/50, Biology exam-16 added at 34/36, and Islamiat exam-02 confirmed final at 30/46 with no changes. Nothing below has been softened or inflated to make this version look better than v59 — two of the three numbers moved up on their own merits after a second read, and Biology's addition is a first appearance, not a correction.

Tarjuma-tul-Quran exam-01: corrected to 43/50 (86.0%, Grade A), now FINAL

The first-pass marking of Seemab's debut Tarjuma-tul-Quran paper scored 42/50. An independent deep-check re-read every disputed answer against the scan at native resolution and against the exact book pages, rather than relying on the answer key's wording alone.

The first pass had misread her Urdu in five places, and correcting all five moved the score to **43/50**:

- Q.2(i): she had translated Surah Maryam ayah 4 (Zakariya's opening plea), not the dua itself (ayat 5–6) — corrected down from 1 to 0.5.
- Q.2(iv): the book's own point is only that creation was "not for mere play," which she stated correctly; the key's extra "points to the Hereafter" criterion isn't in the book — corrected up from 1 to 2 (full marks).
- Q.2(v): no scan page is missing after all (the earlier flag is withdrawn), and her actual wording ("those who believe") is close to but narrower than the book's specific point ("those who help Allah's religion") — corrected from a provisional 2 down to a confirmed 1.
- Section B(b), word 5: she wrote "a place to settle," not "mountain," for رَوَاسِي (firm mountains) — corrected down from 5/5 to 4/5.
- B(c)(ii): "in six days" is written after all (native-resolution re-read settled a genuine ambiguity in the handwriting) — corrected up from 1.5/3 to 3/3 (full marks).
- Q.4: re-derived from the book's own framing of Surah Al-Hajj's Qiyamah content (the Day's conditions, then disbelievers, then believers) rather than the key's separate 5-bullet split — corrected up from 4.5/8 to 5.5/8.

Final section scores: A 10/10, B(a) 6.5/10, B(b) 4/5, B(c) 9/9, C 13.5/16. Her perfect Section A and her full-marks Section C essay on Hazrat Sulaiman (AS) both stand unchanged. Real gaps to work on: writing the Arabic of a dua alongside its translation, رَوَاسِي specifically, the book's exact wording on who Allah helps, Sulaiman's worldly blessings (wealth, kingship, splendour) alongside his miracles, and the specific Qiyamah imagery in Al-Hajj 1–2 (nursing mothers, pregnant women, intoxication).

Biology exam-16-ch1-7: 34/36 (94.4%, A+), deep-checked FINAL — and 8 of 8 repeat errors now fixed

Biology's thirteenth attempt, sat 13 September and deep-checked by class-9-b6, scored **34/36 (94.4%, Grade A+)**: Section A 18/20, Section B 8/8, Section C 8/8.

Q	Topic	Result
---	-------	--------

12	Which system removes the malaria parasite? She chose "lymphatic"; the book's Table 5.2 answer is "immune system."	Wrong
17	Bond type released in respiration. She chose "hydrogen bonds"; the correct answer is "high-energy bonds."	Wrong

Atif's ruling on Q.2(ii): two of her stated reasons for malaria's persistence (insecticide resistance and drug resistance) are correct biology but are not in the textbook. A strict textbook-only reading would score this 32/36; Atif ruled in her favour since both points are factually sound, so the final score stands at **34/36**.

All four deliberately re-set repeat-error questions were answered correctly: Q.2 (law vs theory), Q.8 (cleavage furrow), Q.14 (purine), and Q.15 (hydrophobic). Combined with the four repeat errors fixed on Physics exam-15 five days earlier (gradient, area under a speed-time graph, SI unit of pressure, renewable vs non-renewable), that is now **8 out of 8** previously-wrong questions answered correctly the second time they were deliberately re-tested — the clearest evidence yet that targeted re-testing of old mistakes is working.

Islamiat exam-02: 30/46 (65.2%, Grade B), now CONFIRMED FINAL

An independent deep-check of Islamiat exam-02 made **no changes to the score**: Section A 17/30, Q.2(i) 2/4, Q.2(ii) 4/4, Q.3 7/8, written work 13/16 (81%) — unchanged from v59. A suspected off-by-one shift in the MCQ answer key alignment was specifically tested and ruled out; the wrong answers are genuine, not a marking artefact.

Where marks were lost, in detail:

- **The Bab 3 Seerat cluster.** Eight of eleven MCQs from Q.10 to Q.20 were wrong — Fatah-e-Makkah, Ghazwa Hunain, Tabuk and Hajjat-ul-Wida, all dense number-and-name-heavy facts.
- **Second-guessing.** On both Q.20 and Q.25 she first wrote the correct option D, then crossed it out and switched to a wrong answer.
- **Confusable pairs.** Q.23 رشك (rashk) vs حسد (hasad), and Q.25 Hazrat Shifa vs Hazrat Umm Atiya — the same mix-up pattern already tracked in her other subjects, now appearing on new content.

- **Written answers.** Q.2(i) announced "two results" (دو نتائج) but gave only one; Q.3 named all three eras of compilation correctly but omitted the opening citation of Surah al-Hijr, ayah 9.

Version note: she answered Version B of the paper, so all 46 marks were within syllabus.

Version A was superseded on 11 September and never sent. No score adjustment arises from this.

The multiple-choice problem is fixed

Physics exam-15 came in at 45/46 (97.8%), her strongest paper of the year. Three weeks ago multiple choice was the clear weak point of her work. The trajectory since:

Paper	Date	MCQ score
Mathematics exam-17	7 Sep	6/10 (60%)
Chemistry exam-21	9 Sep	25/30 (83%)
Physics exam-15	10 Sep	29/30 (97%)

She was asked to change one thing, and she changed it. The diagnosis on 8 September was that her multiple choice failed not from missing knowledge but from answering quickly with nothing written down. The instruction was to do rough working on paper for every MCQ. This attempt is the first where she has written out working and a stated reason for her multiple-choice answers rather than only letters. The score moved with the behaviour.

All four repeat errors corrected in one paper. Four questions on Physics exam-15 were chosen deliberately because they are exact items she had got wrong before: the gradient of a speed-time graph, the area under one, the SI unit of pressure, and renewable versus non-renewable resources. She answered all four correctly, three with working shown. The single lost mark (Q.3, weight-measuring instrument) was a transcription slip, not a knowledge gap — she reasoned to B and wrote A.

Mathematics exam-17: a diagnosis we got wrong, and the evidence that corrected it

When only her MCQ page had arrived, the reading was that she has a weakness with negative numbers: three of her four wrong answers involved a sign. That diagnosis was recorded and it was wrong. Her written sections disprove it: she solves a compound inequality to $-3 < x \leq 4$ with the negative bound correct, evaluates $(-3)^2$ and $(-4)^2$ correctly inside a distance calculation, computes $\log 0.9 = -0.0458$, and on the right-angled-triangle question caught and corrected her own sign error unprompted.

She is not weak at negative numbers. She is weak at answering quickly with nothing written down. Every sign error was on a multiple-choice question answered mentally; she made none where she showed her steps. The remedy is a method change (rough working for MCQs), not topic revision.

One genuine knowledge gap remains outstanding: the product rule for radicals ($\sqrt{48} + \sqrt{27}$ should simplify to $4\sqrt{3} + 3\sqrt{3} = 7\sqrt{3}$ before adding, Unit 1 §1.4.3), and a narrower one, reading $|-8|$ as -8 on a form she had never been asked to evaluate before (only solve).

Answering less than the question asked: the six-paper streak, now broken

Version 54 recorded this pattern across five papers; Maths exam-17 added three more instances in a single paper (2.5 marks lost to "show that," "hence," "verify" and "prove" questions left without a written conclusion, even when the working already proved the answer). Chemistry exam-21, two days later, lost nothing to this habit — the streak is broken, and it is worth confirming it holds on the next attempt before calling it fixed for good.

The school examination, and what it validated

Seemab sat the OPF Girls College First Term Examination in August across Chemistry, Biology, Physics and Mathematics. All four papers were checked question by question against all 65 practice papers at the time: of 82 question slots, 74 had been set before, 8 near-verbatim, and every question fell inside the studied syllabus. Two corrections came out of it: coverage trackers stopped avoiding "over-drilled" topics (physics theory-versus-law, chemistry Chapters 8–9) since the school set them anyway, and the no-geometry-box

exclusion of Maths Unit 10 was flagged as a demonstrated risk rather than a safe simplification, since the school did examine it.

The one open read is now closed

MCQ 10 on Maths exam-17 could not be marked: she wrote a coordinate pair instead of an option letter and overwrote the first digit in solid ink, and no stroke structure survived at 600dpi under four binarization thresholds. Atif ruled on 9 September that it counts as wrong, the same standard a board would apply to an unreadable answer. Mathematics exam-17 is final at 43.5/50.

exam-16-ch1-7	13 Sep 2026	34/36	94.4%	A+	NEW

MCQ: 177/188 (94.1%). Exam-16 lost Q.12 (immune system, not lymphatic) and Q.17 (high-energy bonds, not hydrogen bonds). All four deliberately re-set repeat-error questions (law vs theory, cleavage furrow, purine, hydrophobic) were answered correctly — the syllabus boundary confirmation from the school exam holds.

TARJUMA-TUL-QURAN — 86.0% | 43/50 | 1 attempt

Exam	Date	Score	%	Grade	Flag
exam-01-maryam-anbiya-hajj-naml-luqman-sajdah	13 Sep 2026	43/50	86.0%	A	CORRECTED · FINAL

MCQ: 10/10 (100%) — a perfect debut Section A, unchanged by the correction. Section A 10/10, B(a) 6.5/10, B(b) 4/5, B(c) 9/9, C 13.5/16. Corrected from a first-pass 42/50 after an independent deep-check found five misreadings of her Urdu handwriting; see the callout above for the full breakdown.

ISLAMIAT — 65.2% | 30/46 | 1 attempt

Exam	Date	Score	%	Grade	Flag
exam-02-bab1-2-3-4-6-7	13 Sep 2026	30/46	65.2%	B	CONFIRMED FINAL

MCQ: 17/30 (56.7%), her weakest MCQ subject so far, concentrated in the Bab 3 Seerat cluster (8 of 11 wrong, Q.10–20) plus two confusable pairs. Written work: 13/16 (81%). No changes on deep-check; not directly comparable to her four established subjects as a first attempt in a brand-new one.

Priorities for the next fortnight

1. **Keep writing the concluding sentence.** Broken after six papers on Chemistry exam-21. Confirm it holds on the next attempt before calling it fixed.
2. **Check the option letter against your own reason.** The rough working is now established (60% → 83% → 97% on MCQs across three subjects). The remaining leak is transcription:

on Physics exam-15 she reasoned to B and wrote A, and on Maths exam-17 she wrote a value instead of a letter and it could not be read. Always write the letter, and check it matches the argument.

3. **The product rule for radicals** (Unit 1 §1.4.3), still outstanding from Maths exam-17.
4. **Chemistry recall pairs.** A catalyst does not change ΔH ; electron affinity is the opposite of ionization energy; giant covalent versus simple molecular structure. All five exam-21 losses are flashcard material.
5. **A geometry box.** Unit 10 is examinable at her school and has been excluded from every practice paper since July.
6. **Islamiat Bab 3, Seerat facts.** Wadi Hunain's distance, the tribes there, who rallied the fighters, Kaab bin Malik's repentance, the Hajjat-ul-Wida year and Ghadeer-e-Khum — a dedicated re-read of Fatah Makkah through Hajjat-ul-Wida, plus flashcards for Hasad vs Rashk and Hazrat Shifa vs Hazrat Umm Atiya.
7. **Tarjuma-tul-Quran: write the Arabic, not just the translation.** When a question asks for a dua or ayat, write the Arabic text itself alongside the meaning; it usually carries its own separate mark. Also worth direct review: رَوَّاسِي, who Allah helps in Al-Hajj, Sulaiman's worldly blessings, and the specific Qiyamah imagery in Al-Hajj 1–2.
8. **Biology: Q.12 and Q.17 recall.** The immune system (not the lymphatic system) removes the malaria parasite per Table 5.2; respiration releases energy from "high-energy bonds," not hydrogen bonds. Both are one-line flashcard fixes.

Resolved since v59: the Quran Q.2(v) missing-page question has been checked and closed — no page is missing, and the mark is now final rather than provisional.

Marking method: Tarjuma-tul-Quran exam-01's correction was produced by an independent deep-check that re-read every disputed answer against 400dpi+ crops of the CamScanner scan and against the exact cited book pages, not just the answer key; the first-pass report (42/50) is kept alongside the corrected one (43/50) in the attempt folder for reference. Biology exam-16 was deep-checked by class-9-b6 against the printed question paper, with Atif ruling directly on the one contested judgement call (Q.2(ii)). Islamiat exam-02 was independently re-checked with a specific test for an off-by-one shift in the MCQ key alignment, which was ruled out; the score is unchanged and now final. Maths exam-17 and Chemistry exam-21 were each marked twice with independent re-derivation from the question papers, as recorded in v57.

Version history (most recent):

Version	Date	Headline
---------	------	----------

v57	10 Sep 2026	Physics exam-15, 45/46 (97.8%) — strongest paper of the year, MCQ weakness resolved
v58	13 Sep 2026	Islamiat exam-02 added as a fifth subject (30/46); built before a concurrent session's Quran attempt was visible, so it does not include Tarjuma-tul-Quran. Retained unedited per the additive-only rule.
v59	14 Sep 2026	Reconciled both 13 September debuts: added Tarjuma-tul-Quran exam-01 at its first-pass score (42/50) alongside Islamiat exam-02; six subjects, but no Biology exam-16 yet and Quran not yet deep-checked.
v60	14 Sep 2026	First version with all three 13 September attempts final: Tarjuma-tul-Quran corrected to 43/50 after deep-check, Biology exam-16 added at 34/36 (8/8 repeat errors now fixed across two subjects), Islamiat exam-02 confirmed final at 30/46 with no changes.

Full lineage v1 through v60 is retained, unedited, in seemab-reports/; per the additive-only rule, no prior version is ever overwritten or deleted.
