

Biology Exam 13: Per-Exam Overview

Chapters 1-7 (Full Syllabus) | Seemab Ali | Federal Board (FBISE) Class 9 | Attempt: 2026-07-31 | Version 1 | Total Marks: 65

12/12 SECTION A (MCQS)	33/33 SECTION B (SHORT)	19.5/20 SECTION C (LONG)	64.5/65 TOTAL, 99.2%	A+ GRADE
---------------------------	----------------------------	-----------------------------	-------------------------	-------------

Biology's best-ever score on a fresh, previously-unseen full-syllabus Ch1-7 paper — and its 2nd-highest score of any kind, only half a mark short of a perfect 65/65. The single deduction on the whole paper is half a mark on Q.3(iv)OR(b): Seemab gave the correct enzyme pH values, locations and acid/alkaline contrast, but not the deeper active-site-shape reasoning the question asked for. Marking independently verified by two separate deep-check passes, both confirming 64.5/65.

Section Breakdown	
Section A: MCQs (12/12)	100.0%
Section B: Short Questions (33/33)	100.0%
Section C: Long Questions (19.5/20)	97.5%
Overall (64.5/65)	99.2%

Strengths	Areas for Revision
- Perfect Section A (12/12) — every MCQ correct, recorded as a numbered list on the last scan page and fully legible. - Perfect Section B (33/33) — Biology's first flawless Section B on a fresh, non-resit paper. - Section C nearly perfect (19.5/20, 97.5%) — the biological-method worked example, meiosis II's four stages, and the full DNA-to-protein central dogma explanation all scored a clean 5/5. - Correct $2n=12 \rightarrow \text{haploid}=6$ chromosome derivation (Q2(v)OR) and all five mitosis-figure stage labels A-E (Q2(vi)). - Enzyme specificity explained with the full active-site mechanism and a concrete worked example (Q3(iv)OR(a)). - Correctly uses "the equator of the spindle" for Metaphase II (Q3(ii)), confirming the underlying meiosis concept is solid. - First Biology exam in five attempts (since exam-09) with zero instances of the "stopping before completing every required part" pattern.	- Q.3(iv)OR(b): correct pepsin/trypsin optimum pH values (2.00/8.00), locations, and acid/alkaline contrast all given, but the deeper reasoning (each enzyme's active site is shaped to work only at its own environment's pH) was not written. 2nd occurrence of this exact gap on this exact sub-topic (also on exam-12's Q2(ix)/Q3(iv)) — worth a dedicated flash-card drill on "why enzymes have an optimum pH." - Terminology slip: "equilateral plate" instead of "equatorial plate" (Q.2(v)OR). Marks unaffected (3/3) and not a conceptual error — she uses the correct term for Metaphase II a few pages later — but worth tidying up. - Q.2(iii)OR named Fungi correctly as the required Eukarya kingdom for saprotrophs, but also added Bacteria alongside it; Bacteria is its own separate, prokaryotic domain, not a Eukarya kingdom. Marks unaffected (3/3), but worth a quick review of the domain-vs-kingdom hierarchy. - No other mark-losing errors found anywhere on the paper.

Comparison vs Previous Biology Attempts					
Date	Exam	MCQ	Total	%	Grade
3 Apr 2026	exam-01-ch1-6	11/12	52/65	80.0%	A
30 Apr 2026	exam-02-ch7 (1st)	12/12	60.5/65	93.1%	A
2 May 2026	exam-02-ch7 (re-sit)	12/12	65/65	100%	A+
8 Jun 2026	exam-03-ch4	12/12	62.5/65	96.2%	A+
23 Jun 2026	exam-07-ch1-7	12/12	57.5/65	88.5%	A
29 Jun 2026	exam-08-ch1-7	12/12	54.5/65	83.8%	A
6 Jul 2026	exam-09-ch1-7	12/12	61.25/65	94.2%	A+
16 Jul 2026	exam-11-ch1-7	10/12	56.4/65	86.8%	A
22 Jul 2026	exam-12-ch1-7	12/12	60.3/65	92.8%	A+
31 Jul 2026	exam-13-ch1-7 (this exam)	12/12	64.5/65	99.2%	A+

A fresh, previously-unseen full-syllabus Ch1-7 paper (exam-13, Version 1). At 99.2% this clears Biology's previous best fresh-paper score (exam-09, 94.2%) by a wide margin and sits just half a mark below a perfect 65/65. Section A returned a clean 12/12 (again a numbered-list format, fully legible and verified). Section B is a flawless 33/33 for the first time on a genuinely new paper. Section C's only loss is the recurring enzyme-pH depth gap, now confirmed on two consecutive full-syllabus attempts (exam-12 and exam-13). Marking independently verified by two separate deep-check passes, both confirming 64.5/65.
