

Chemistry Exam 15: Per-Exam Overview

Chapters 1-9 (Full Syllabus) | Seemab Ali | Federal Board (FBISE) Class 9 | Attempt: 2026-07-14 | Version 4 | Total Marks: 65

12/12 SECTION A (MCQS)	33/33 SECTION B (SHORT)	20/20 SECTION C (LONG)	65/65 TOTAL, 100%	A+ GRADE
---------------------------	----------------------------	---------------------------	----------------------	-------------

TROPHY: Perfect Score. First-ever 100% in Chemistry, and the fourth perfect score of Seemab's Class 9 journey.

Section Breakdown

Section A: MCQs (12/12)		100%
Section B: Short Questions (33/33)		100%
Section C: Long Questions (20/20)		100%
Overall (65/65)		100%

Strengths

- MCQs 12/12, redeeming the exact equilibrium concept (closed system) that cost the only mark on exam-14
- Full-syllabus command: isotope-weighted relative atomic mass, oxidation numbers, empirical/molecular formula, bond-energy enthalpy, and multi-step propane stoichiometry all correct with complete working
- Nuclear chemistry: alpha decay equation balanced on mass and charge, particle correctly named
- Every one of the 11 Section B questions and all 4 Section C questions attempted with every sub-part completed, no early stops
- Self-corrected an arithmetic slip mid-working on Q.2(v)(c) rather than leaving the wrong answer standing

Areas for Revision

- None this attempt. Zero marks were lost anywhere on the paper.
- Only a cosmetic note: Q.2(i) labelled the final answer "0.2 g/mol" instead of "0.2 mol". No marks lost, but worth a quick habit check on units.

Seemab's strongest Chemistry paper to date, and her first-ever 100% in the subject, ahead of the previous best of exam-01 (98.5%). This closes a run of three consecutive full-syllabus Ch1-9 papers (exam-12: 96.2%, exam-13: 93.1%, exam-14: 92.3%) with the best result of the four, and it is the first Chemistry attempt where Section B and Section C were both perfect at the same time.
