

Chemistry Exam 16: Per-Exam Overview

Chapters 1-9 (Full Syllabus) | Seemab Ali | Federal Board (FBISE) Class 9 | Attempt: 2026-07-22 | Version 5 | Total Marks: 65

12/12
SECTION A (MCQS)

32/33
SECTION B (SHORT)

20/20
SECTION C (LONG)

64/65
TOTAL, 98.5%

A+
GRADE

Chemistry's 2nd-highest score to date, behind only exam-15's perfect 100%. Section C is a clean 20/20 and MCQs are a perfect 12/12, the 2nd consecutive perfect MCQ score in the subject.

Section Breakdown

Strengths

- MCQs 12/12 — 2nd consecutive perfect MCQ score for Chemistry, after exam-15
- Section C fully flawless (20/20): isotope reverse-calculation, empirical/molecular formula, balancing $P_4 + 5O_2 \rightarrow 2P_2O_5$, both oxidation-state derivations ($Cr = +3$, $N = +5$), redox agent identification ($Al/CuSO_4$), and the diamond-vs-graphite structure/uses comparison all correct with complete working
- Every one of the 11 Section B questions and all 4 Section C questions attempted with every sub-part completed — no early stops anywhere on the paper
- Precise stoichiometry throughout: $KMnO_4$ molar mass (158 g/mol) $\rightarrow$ 0.2 mol, and C_2H_6 combustion balanced and atom-checked
- Correctly self-corrected a mid-answer mix-up in Q2(vii) (crossed out a misplaced note and inserted the right justification)

Areas for Revision

- Q2(i) –0.5:** gave an example application for polymer chemistry (nylon, Teflon) but not for medicinal chemistry. When a question asks for "one example of EACH," give both.
- Q2(vii) –0.5:** named four valid industrial uses of graphite but left one (electrodes/anodes in electrolytic furnaces) without its structural-property justification.
- Cosmetic only, no marks lost: "exothermic" spelled phonetically as "enotermic" twice in Q2(x); the underlying science (ΔH negative, heat released) was correct both times.

Comparison vs Previous Chemistry Attempts

Date	Exam	MCQ	Total	%	Grade
12 Apr 2026	exam-01-ch1-2	12/12	64/65	98.5%	A+
17 Apr 2026	exam-02-ch3-5	12/12	59.5/65	91.5%	A+
12 May 2026	exam-03-ch6	12/12	57.5/65	88.5%	A+
12 Jun 2026	exam-04-ch7	12/12	60/65	92.3%	A+
24 Jun 2026	exam-12-ch1-9	12/12	62.5/65	96.2%	A+
30 Jun 2026	exam-13-ch1-9	12/12	60.5/65	93.1%	A+
6 Jul 2026	exam-14-ch1-9	11/12	60.0/65	92.3%	A+
14 Jul 2026	exam-15-ch1-9	12/12	65/65	100%	A+
22 Jul 2026	exam-16-ch1-9 (this exam)	12/12	64/65	98.5%	A+

Seemab's 2nd-strongest Chemistry paper to date, just behind exam-15's perfect 100%, and the 2nd-best of the five full-syllabus Ch1-9 papers (exam-12: 96.2%, exam-13: 93.1%, exam-14: 92.3%, exam-15: 100%, exam-16: 98.5%). This is also the first time Chemistry has posted two consecutive perfect Section C results and two consecutive perfect MCQ scores in a row. Only two small, isolated half-mark deductions in Section B (a missing example, a missing justification) separate this paper from a second straight perfect score.
