

Chemistry | Chapters 1 to 9 (Comprehensive)

Revision Test 2026 | SSC-I (9th Grade) | Version 1 | 31-mark no-choice paper

Candidate: Seemab | Date: 18 August 2026 | Total Marks: 31 | Syllabus: Nature of Chemistry, Matter, Atomic Structure, Periodic Table, Bonding, Stoichiometry, Electrochemistry, Energetics, Equilibrium

29 / 31 TOTAL SCORE 2 MCQs voided on SLO audit	93.5% PERCENTAGE first issued as 87.1%	A+ GRADE was reported as A	12 / 12 MCQ 10 correct, 2 voided
---	---	---	---

Section Breakdown

Section	Performance	Score
Section A (MCQs)		12/12 (100%)
Section B (Short Ans.)		9/9 (100%)
Section C (Long Ans.)		8/10 (80%)

Per-Question Marks

Q	Topic	Awarded	Max	Note
A.1-12	All twelve multiple choice	12	12	Ten answered correctly; Q5 and Q6 voided as out of syllabus
2(i)	Molar mass of SO ₂ ; mass of one molecule	3	3	1.06×10 ⁻²² g, fully correct
2(ii)	Dot-and-cross H ₂ O, bond type, lone pairs	3	3	Diagram, covalent bond and 2 lone pairs all correct
2(iii)	Oxidation numbers (H ₂ SO ₃ , Na ₂ CO ₃ , KIO ₄)	3	3	+4, +4, +7 with working. Full marks
3(i)	Empirical → molecular formula; moles in 18 g	4	5	CHO ₂ and C ₂ H ₂ O ₄ correct; used empirical mass 45 instead of 90 for the moles
3(ii)	Ag isotopes; sub-atomic particles; N configuration	4	5	107.96 and 47/47/62 correct; group and period swapped

Two questions voided on syllabus audit (revision issued 19 August 2026)

Chapter 4's Student Learning Outcomes contain **no outcome** covering who discovered the atomic number (Q5) or how many elements sit in each period (Q6). Both facts are printed in the book but neither is something her course asks her to know, so both fail the two-part syllabus test and **both marks are awarded to her**. Q6 had been scribbled out and left unreadable; it is now void regardless of intent, which closes that open item. The paper rises from **27/31 (87.1%, A)** to **29/31 (93.5%, A+)**, and her Section A becomes **12/12**.

Headline

Her first paper in the short 31-mark no-choice format. Section B was flawless on genuinely new material, including three oxidation numbers on compounds never previously set. Both Section C losses are single conceptual slips rather than method failures: using the empirical formula mass in place of the molecular molar mass, and swapping group with period. Both MCQ problems fell on Chapter 4 items later found to be outside her outcomes, and both have been voided in her favour. Every question on this paper that was genuinely in her course, she answered correctly.
