95.8%

Section Breakdown

Section	Performance	Score
Section A (MCQs)		23/24 (95.8%)
Section B (Short Ans.)		8/9 (88.9%)
Section C (Long Ans.)		10/10 (100%)

Per-Question Marks

Q	Topic	Awarded	Max	Note
A.1-24	All twenty-four multiple choice	23	24	Only Q13 wrong: chose the $a^3 - b^3$ form for $a^3 + b^3$
2(i)	Radical to exponential; laws of exponents	3	3	$x^{5/4}$, $a^{2/3}$ and x^4 . Every step correct
2(ii)	Laws of logarithms; $\log_5 125$	3	3	$\log(mn/p)$ and $x = 3$. Full marks
2(iii)	Solving a linear inequality	2	3	Algebra and solution set perfect; did not name the properties as asked
3(i)	Factorization; HCF and LCM	5	5	All three parts clean, including the verification to $96a^3b^4$
3(ii)	Distance and mid-point	5	5	$AB = 10$, $M = (2,6)$, both halves verified at 5 units. Flawless

Syllabus audit

All 24 MCQs were written against the Student Learning Outcomes printed in Seemab's own textbook, and every question she got wrong was re-checked afterwards and confirmed to sit on a stated SLO. Nothing came from another subject or from outside her studied chapters. Full citation table in the marking report and the coverage tracker.

Headline

Her strongest paper in months

and her best MCQ percentage on any 24-question set.

Section C was perfect.

The single MCQ miss was the sum-of-cubes sign, and she then used the correct

identity in Section C, so the knowledge is there. The only other mark went on not naming the properties of inequalities, which the question explicitly asked for.
