Physics MCQ record: 95/96 across all 8 Physics exams (98.96%) – the flawless 84/84 (100%) all-time record ends here on Q7. Subject average rises to **95.0% (494.0/520, 8 exams)**, overtaking Mathematics (94.5%) to become Seemab's strongest subject.

Strengths on This Attempt

- Perfect Section B (33/33) and perfect Section C (20/20) – only the second Physics paper with both fully flawless.
- Every long question's OR/Main sub-parts completed in full – no stopping-early anywhere on this paper.
- Correct first-principles derivations: $P = pgh$, and impulse-momentum $F\Delta t = \Delta p$ from Newton's second law.
- Layered-liquid pressure (oil over water) correctly split into "oil alone" vs. "total at bottom."
- Second-highest Physics score to date (98.5%, just behind exam-09's 99.2%).

Priority Revision Targets

- CG of bent/irregular shapes:** the centre of gravity of an L-shaped lamina can lie outside the material, in the empty space of the bend – revisit the textbook's bent-arm CM/CG figure. This was the only mark lost on the whole paper.
- Equation notation habit (no marks lost):** keep using v_i/v_f consistently rather than a bare v when writing the general equations of motion.
