

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 30 | Updated: 6 July 2026 | 26 attempts across 4 subjects

Note on this version (v30): Biology exam-09-ch1-7 added (61.25/65, 94.2%, A+). This is Biology's strongest full-syllabus Ch1-7 paper to date — a +10.4 point jump over the immediately prior attempt, exam-08-ch1-7 (83.8%, 29 June), and +5.7 points over exam-07-ch1-7 (88.5%). Two questions, 2(ii) and 2(iii), were initially missing from the first (incomplete) 11-page scan; a complete 12-page re-scan recovered both, and each scored full marks (3/3). The only meaningful deduction was a two-part long question (Q.3(ii)) where the plant-vs-animal comparison table was completed in full but the stem-cells half was never attempted, costing 2 of the 3.75 marks lost. Overall now 93.0% (1572.25/1690). The Biology subject average rises from 90.3% to 90.8% but remains the weakest of the four subjects. MCQ 12/12 — 13th consecutive perfect MCQ score across all subjects. All prior figures carry forward unchanged.

1572.25/1690 OVERALL TOTAL	93.0% OVERALL AVERAGE	310/312 MCQ RECORD (99.4%)	3 PERFECT 100% SCORES	13 CONSECUTIVE PERFECT MCQS

MCQ Trend (per attempt, attempts 1 through 26)

Only 2 MCQ errors across 26 attempts (310/312, 99.4%). Current run: **13 consecutive perfect MCQ scores** (attempts 14 through 26, ongoing).

Biology's Best Full-Syllabus Paper: exam-09-ch1-7

Both prior comprehensive Ch1-7 papers underperformed Biology's single-chapter attempts (exam-07: 88.5%, exam-08: 83.8%). exam-09-ch1-7 breaks that trend at 94.2% — the best full-syllabus Biology paper by a wide margin, and Biology's 3rd-highest score overall. Two questions recovered from a re-scan (2(ii), 2(iii)) both scored full marks, confirming the content gap was purely a scanning issue, not a knowledge gap.

Watch-Item: Two-Part Question Half Skipped (Biology, new data point)

Math exam-11's 2nd attempt (5 July) broke the 9-exam cross-subject streak of leaving required sub-parts incomplete. One exam later, Biology exam-09 (6 July) shows a related lapse in a different subject: Q.3(ii) asked for a plant-vs-animal comparison **and** a description of stem cells; Seemab completed the comparison table in full but never attempted the stem-cells half, costing 2 of the 3.75 marks lost on the paper. The broader multi-sub-part-skipping streak (which ran across Math/Physics/Chemistry, exams 16 through 24) remains broken, but this is a reminder that the same underlying habit — treating a two-part question as finished after the first part — can resurface in any subject. Continue the drill: before moving on, count how many distinct things a question asks for and tick off each one.
