

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 31 | Updated: 7 July 2026 | 27 attempts across 4 subjects

Note on this version (v31): Chemistry exam-14-ch1-9 added (60.0/65, 92.3%, A+, deep-checked). This is Chemistry’s third full-syllabus Ch1–9 paper, completing a tight cluster with exam-12 (96.2%) and exam-13 (93.1%). exam-14 carries Chemistry’s **first-ever MCQ error** (Q12 — equilibrium needs a closed system), so the subject moves off a perfect 72/72 to 83/84 and the **13-exam consecutive perfect-MCQ streak (attempts 14-26) ends here**. The one substantive deduction is 3(ii)(b) — number of molecules in 3.6 g of water — left entirely unattempted (–2), the same “half a long question skipped” habit flagged on Biology exam-08/09. Overall now 93.0% (1632.25/1755). Chemistry subject average holds at 93.2% across 7 papers. All prior figures carry forward unchanged.

---	--	--	--

MCQ Trend (per attempt, attempts 1 through 27)

Only 3 MCQ errors across 27 attempts (321/324, 99.1%). The 13-exam perfect run (attempts 14–26) ended at attempt 27 — Chemistry exam-14, Q12 (equilibrium needs a closed system). Prior slips: attempt 1 (Biology exam-01) and attempt 13 (Math exam-07).

Chemistry’s Full-Syllabus Cluster is Complete and Consistent

Three comprehensive Ch1–9 papers now sit within four points of each other: exam-12 (96.2%), exam-13 (93.1%) and exam-14 (92.3%). Across all three she carries the full nine chapters cleanly — atomic structure, bonding, stoichiometry, electrochemistry, energetics and equilibrium — with every stoichiometry and oxidation-state calculation correct on this paper. Chemistry stays the second-strongest subject at 93.2%, just behind Mathematics.

Watch-Item: The Sub-Part-Skipping Habit Persists Across Subjects

On exam-14 the only substantive loss was 3(ii)(b) — molecules in 3.6 g of water — left completely blank (–2 of the 5 marks lost). She performs the identical mole→molecules step correctly elsewhere on the same paper (2(vi), 3(iv)), so this is a completion lapse, not a knowledge gap. It is the same pattern seen on Biology exam-08 and exam-09 (a two-part question with the second half skipped). The drill is unchanged and now cross-subject: before leaving any long question, count how many separate parts it asks (a / b / i / ii) and tick each one off. Two other small, fully recoverable habits appeared — omitting state symbols when explicitly asked (2(vii), –1) and one wrong periodic-trend reason (2(iv), –0.5).

Version History (recent entries)

Version	Date	Change	Overall at that point
v28	3 Jul 2026	Math exam-11 added (58.5/65, 90.0%, A+, deep-check verified); overall 92.8% (1447.5/1560)	24 attempts
v29	5 Jul 2026	Math exam-11 re-attempted (63.5/65, 97.7%, A+); overall 93.0% (1511/1625)	25 attempts
v30	6 Jul 2026	Biology exam-09 added (61.25/65, 94.2%, A+); 2(ii)/2(iii) recovered from re-scan; overall 93.0% (1572.25/1690)	26 attempts
v31	7 Jul 2026	Chemistry exam-14 added (60.0/65, 92.3%, A+, deep-checked); first Chemistry MCQ error — 13-exam perfect-MCQ streak ends; overall 93.0% (1632.25/1755)	27 attempts
