First-ever MCQ miss (Q7, exam-10) ends the flawless 84/84 all-time record, but the subject average still climbs to become Seemab's strongest

MCQ: 93/96 (96.9%), 2 errors (exam-01, exam-11)

Unchanged this version; still the weakest subject, gap to Chemistry widens to 3.7 points

MCQ Trend (per attempt, attempts 1 through 32)

6 MCQ errors across 32 attempts (378/384, 98.4%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11). Newest: attempt 32 (Physics exam-10, 11/12) – Physics' first-ever MCQ error, ending its flawless all-time 84/84 record. Two imperfect MCQ attempts in a row now (31 and 32), though in different subjects with different questions missed.

Physics Trades a Flawless MCQ Record for a Near-Perfect Paper

Physics exam-10 (98.5%) pulls in two directions at once. Section B and Section C both landed at a perfect 33/33 and 20/20 – only the second Physics paper ever with both sections fully flawless (after exam-03's clean 100%), and every OR/Main sub-part was completed in full, with none of the "stopping before finishing every sub-part" pattern that has recurred elsewhere in her file. Against that, a single wrong bubble on Q7 (centre of gravity of an L-shaped lamina) ends Physics' flawless all-time MCQ record at 84/84; the subject's tally is now 95/96 (98.96%). Physics' subject average still climbs to 95.0% (494.0/520, 8 exams), overtaking Mathematics (94.5%) to become Seemab's strongest subject outright.

One Watch-Point From This Attempt

The centre-of-gravity-of-irregular-shapes concept (Q7) is a clean, revisable gap rather than a careless slip – Seemab flagged her own doubt with a self-marked X next to this answer at the time, but did not change it. Worth a quick flash-card revisit of the textbook's bent-arm CM/CG figure (a shape's CG can fall in the empty space outside its material) before the next mechanics-heavy paper.
