

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 37 | Updated: 17 July 2026 | 33 attempts across 4 subjects

Note on this version (v37): Math exam-13-ch1-2-4-5-7 added, **58.5/65 (90.0%, Grade A+)**. MCQ dropped to 11/12 (Q5, "reference position" of the small decimal 0.00532) — the third consecutive imperfect MCQ attempt (after Biology exam-11's 10/12 and Physics exam-10's 11/12), though a different subject and a different question each time. Section B was strong but not perfect (32/33 — 9 of the 11 attempted short questions scored full marks; two lost 0.5 each to final-line transcription slips) and Section C fell to 15.5/20 — Math's lowest Section C score since exam-11's first attempt — driven by a 10× misread of a given Rupee figure, a log×40 multiplication slip, an inequality case that flipped direction without justification, and an unwritten quadrilateral-classification conclusion. Math's subject average slips from 94.5% to **94.0%** (550.0/585, 9 attempts), landing in a dead heat with Chemistry (also 94.0%), both trailing Physics (95.0%). Overall average moves from 93.5% to **93.4%** (2002.65/2145, 33 attempts). MCQ record: 389/396 (98.2%).

* Chemistry exam-01 Section C shows 21/20 due to a historical bonus mark in the original marking. Biology exam-02-ch7 and Math exam-11-ch1-2-4-5-7 were each sat twice; both attempts count separately.

PHYSICS ★ TOP	95.0% 494.0/520 8 exams
	
MCQ: 95/96 (98.96%) — Unchanged this version; still Seemab's strongest subject, about 1.0 point ahead of Math and Chemistry	
MATHEMATICS	94.0% 550.0/585 9 attempts
	
MCQ: 106/108 (98.1%), 2 errors (exam-07, exam-13) — Slips from 94.5% to 94.0% after exam-13's dip; now in a dead heat with Chemistry for 2nd place, both trailing Physics	
CHEMISTRY	94.0% 489.0/520 8 exams
	
MCQ: 95/96 (99.0%), 1 error (exam-14) — Unchanged this version; now tied with Math at 94.0% for 2nd place	
BIOLOGY	90.3% 469.65/520 8 attempts
	
MCQ: 93/96 (96.9%), 2 errors (exam-01, exam-11) — Unchanged this version; still the weakest subject, gap to Chemistry stays at 3.7 points	

MCQ errors across 33 attempts (389/396, 98.2%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11), attempt 32 (Physics exam-10). Newest: attempt 33 (Math exam-13, 11/12) – third consecutive imperfect MCQ attempt, though a different subject and a different question missed each time (Biology's centre-of-gravity-unrelated misses, Physics' centre-of-gravity Q7, Math's reference-position Q5).

Math exam-13: Final-Line Slips Across Both Sections B and C

Math exam-13 (90.0%) shows a consistent pattern rather than an isolated slip. Section B fell just short of perfect at 32/33 — 9 of the 11 attempted questions, including the antilog and HCF-by-factorization items, scored full marks (and Seemab even caught a likely rounding slip in the answer key itself: $\text{antilog}(2.4324)$, her 270.7 is mathematically closer to the true value, 270.645, than the key's own stated 270.8), but two questions (Q2(vii), Q2(ix)) each lost 0.5 when the final answer line dropped a term or carried a stray exponent despite fully correct working underneath. Section C fell to 15.5/20, Math's lowest Section C score since exam-11's first attempt (15/20, 2026-07-03), from four losses: a $10\times$ misreading of a given Rupee figure (Rs. 600,000 read as Rs. 6,000,000), a multiplication slip (40×0.8451 computed as 34.04 instead of 33.804), an inequality case that flipped direction mid-working without justification, and a quadrilateral-classification sentence that was never written despite the correct supporting numbers already sitting on the page.

Math exam-13: Final-Line Slips Across Both Sections B and C

Math exam-13 (90.0%) shows a consistent pattern rather than an isolated slip. Section B fell just short of perfect at 32/33 — 9 of the 11 attempted questions, including the antilog and HCF-by-factorization items, scored full marks (and Seemab even caught a likely rounding slip in the answer key itself: $\text{antilog}(2.4324)$, her 270.7 is mathematically closer to the true value, 270.645, than the key's own stated 270.8), but two questions (Q2(vii), Q2(ix)) each lost 0.5 when the final answer line dropped a term or carried a stray exponent despite fully correct working underneath. Section C fell to 15.5/20, Math's lowest Section C score since exam-11's first attempt (15/20, 2026-07-03), from four losses: a $10\times$ misreading of a given Rupee figure (Rs. 600,000 read as Rs. 6,000,000), a multiplication slip (40×0.8451 computed as 34.04 instead of 33.804), an inequality case that flipped direction mid-working without justification, and a quadrilateral-classification sentence that was never written despite the correct supporting numbers already sitting on the page.

Confirmed Recurring Pattern: The Missing Final Sentence
The missing-conclusion habit is now a confirmed 3rd occurrence for Math: exam-10 (missing diagonal proof for a square), exam-12 (missing property names, missing midsegment conclusion), and now exam-13 (missing quadrilateral classification, Q3(v)(c)). In all three cases the arithmetic was entirely correct; only the final naming or classifying sentence was left out. A related but distinct slip surfaced twice in this same paper: Q2(vii)(a) dropped an x^2 and Q2(ix) carried a stray exponent, both on the final answer line after otherwise-correct working. Note: an earlier read of Q3(iv)(b)'s number line as missing solution-point dots was overturned on deep-check — deliberate circles were confirmed at both -2 and 7 , so this is not a recurrence of the exam-03 number-line gap.

Confirmed Recurring Pattern: The Missing Final Sentence
The missing-conclusion habit is now a confirmed 3rd occurrence for Math: exam-10 (missing diagonal proof for a square), exam-12 (missing property names, missing midsegment conclusion), and now exam-13 (missing quadrilateral classification, Q3(v)(c)). In all three cases the arithmetic was entirely correct; only the final naming or classifying sentence was left out. A related but distinct slip surfaced twice in this same paper: Q2(vii)(a) dropped an x^2 and Q2(ix) carried a stray exponent, both on the final answer line after otherwise-correct working. Version	Date	Change	Overall at that point
v32	7 Jul 2026	Physics exam-09 added (64.5/65, 99.2%, A+, deep-checked); highest physics score, perfect MCQ restarts streak; Physics 94.5% overtakes Math; overall 93.2% (1696.75/1820)	28 attempts
v33	9 Jul 2026	Math exam-12 added (62/65, 95.4%, A+); 2nd perfect MCQ in a row; Math 94.5% edges back to top subject; overall 93.3% (1758.75/1885)	29 attempts
v34	14 Jul 2026	Chemistry exam-15 added (65/65, 100%, A+); Chemistry's first-ever perfect score, 4th perfect score overall; 3rd perfect MCQ in a row; Chemistry rises to 94.0%, within 0.5 points of Math/Physics; overall 93.5% (1823.75/1950)	30 attempts
v35	16 Jul 2026	Biology exam-11 added (56.4/65, 86.8%, A); fresh Ch1-7 paper; MCQ drops to 10/12, ending the 3-exam perfect-MCQ streak; Section C 19.5/20 is Biology's best yet; Biology dips to 90.3%; overall 93.3% (1880.15/2015)	31 attempts
v36	16 Jul 2026	Physics exam-10 added (64/65, 98.5%, A+); MCQ drops to 11/12 (Q7), ending Physics' flawless 84/84 all-time MCQ record; Section B and Section C both perfect (33/33, 20/20); Physics overtakes Math to become the new top subject at 95.0%; overall 93.5% (1944.15/2080)	32 attempts
v37	17 Jul 2026	Math exam-13 added (58.5/65, 90.0%, A+); MCQ drops to 11/12 (Q5), the 3rd consecutive imperfect MCQ attempt; Section B strong but not perfect (32/33) and Section C dips to 15.5/20 on reading/arithmetic slips, an unjustified inequality sign flip, and an unwritten conclusion; Math slips to 94.0%, now a dead heat with Chemistry for 2nd; overall 93.4% (2002.65/2145)	33 attempts
