

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 38 | Updated: 22 July 2026 | 34 attempts across 4 subjects

Note on this version (v38): Biology exam-12-ch1-7 added, **58.3/65 (89.7%, Grade A)**. MCQ dropped to 10/12 (Q.9 trypsin's optimum pH and Q.12 zygote cell-count were both left **BLANK** rather than answered wrong — the first Biology MCQ loss via non-attempt rather than a misread bubble, confirmed genuine at 300 DPI zoom) — the fourth consecutive imperfect MCQ attempt across subjects (after Biology exam-11 10/12, Physics exam-10 11/12, Math exam-13 11/12), and Biology's second consecutive imperfect MCQ attempt specifically. Section B held up well at 29/33 (7 of 11 questions scored full marks) but Q.2(xi)OR lost 2 of its 3 marks for stopping after the first of three required points (amylase production covered; HCl production and pepsin activation never written), continuing Biology's well-documented "stopping before completing every required part" pattern. Section C was excellent at 19.3/20 (96.5%), losing only 0.7 marks on an incomplete pH-vs-rate curve description. Biology's subject average dips slightly from 90.3% to **90.2%** (527.95/585, 9 attempts). Overall average moves from 93.4% to **93.3%** (2060.95/2210, 34 attempts). MCQ record: 399/408 (97.8%).

34	22 Jul 2026	Biology	exam-12-ch1-7	58.3/65	89.7%	10/12	29/33	19.3/20	A

* Chemistry exam-01 Section C shows 21/20 due to a historical bonus mark in the original marking. Biology exam-02-ch7 and Math exam-11-ch1-2-4-5-7 were each sat twice; both attempts count separately.

Subject Performance Cards

PHYSICS ★ TOP

95.0% | 494.0/520 | 8 exams

MCQ: 95/96 (98.96%) — Unchanged this version; still Seemab's strongest subject, about 1.0 point ahead of Math and Chemistry

MATHEMATICS

94.0% | 550.0/585 | 9 attempts

MCQ: 106/108 (98.1%), 2 errors (exam-07, exam-13) — Unchanged this version; in a dead heat with Chemistry for 2nd place, both trailing Physics

CHEMISTRY

94.0% | 489.0/520 | 8 exams

MCO: 95/96 (99.0%). 1 error (exam-14) — Unchanged this version: tied with Math at 94.0% for 2nd place

BIOLOGY

90.2% | 527.95/585 | 9 attempts

MCQ: 103/108 (95.4%), 3 errors (exam-01, exam-11, exam-12) — Dips slightly this version (90.3%→90.2%) after exam-12's 10/12 MCQ and incomplete Q.2(xi)OR; still the weakest subject, gap to Chemistry/Math widens to 3.8 points

MCO Trend (per attempt, attempts 1 through 34)

9 MCQ errors across 34 attempts (399/408, 97.8%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11, 2 misses), attempt 32 (Physics exam-10), attempt 33 (Math exam-13). Newest: attempt 34 (Biology exam-12, 2 misses) — the fourth consecutive imperfect MCQ attempt across subjects, and notably the first time the loss came from two BLANK answers rather than wrong bubbles.

New Failure Mode: Blank MCOs Instead of Wrong Answers (Biology, first occurrence 2026-07-22)

Biology exam-12's two MCQ misses (Q.9 trypsin's optimum pH; Q.12 zygote cell-count) were left with no letter written at all, confirmed genuine at 300 DPI with contrast enhancement, not a scan artifact. This is distinct from every previous MCQ miss on file, which were all wrong bubble choices. Most notably, Q.9's fact (trypsin pH = 8.00) was written out correctly not once but TWICE elsewhere on the very same paper (Q.2ix and Q.3iv), so this specific miss looks like a transcription or time-management slip rather than a knowledge gap. Q.12 (220 specialized cell types) does not recur elsewhere on the paper and may be a genuine recall gap. Only one occurrence so far of the "blank instead of attempted" MCQ pattern; watch for a second before treating it as confirmed recurring.

Confirmed Recurring Pattern: Stopping Before Completing Every Required Part (Biology, 5th occurrence)

Biology exam-12's Q.2(xi)OR asked for three things chewing food for longer achieves (more amylase production; triggering HCl production; activating pepsin). Only the first was written; the answer stopped after one sentence, costing 2 of the 3 marks — the single largest deduction on this paper. This is now a well-established, Biology-specific variant of the file's broader "stopping before finishing every sub-part" family: exam-07 Q.3(ii) (chloroplast omitted), exam-08 (multiple omissions), exam-09 Q.3(ii)OR (stem-cells half never attempted), exam-11 Q.2(vi)OR (lower epidermis half skipped), and now exam-12 Q.2(xi)OR (2 of 3 points missing). Drill fix unchanged: before starting any question with multiple named requirements, list them out first, then tick each one off as it's answered.

Version History (recent entries)

Version	Date	Change	Overall at that point
v33	9 Jul 2026	Math exam-12 added (62/65, 95.4%, A+); 2nd perfect MCQ in a row; Math 94.5% edges back to top subject; overall 93.3% (1758.75/1885)	29 attempts
v34	14 Jul 2026	Chemistry exam-15 added (65/65, 100%, A+); Chemistry's first-ever perfect score, 4th perfect score overall; 3rd perfect MCQ in a row; Chemistry rises to 94.0%, within 0.5 points of Math/Physics; overall 93.5% (1823.75/1950)	30 attempts
v35	16 Jul 2026	Biology exam-11 added (56.4/65, 86.8%, A); MCQ drops to 10/12, ending Biology's 13-exam perfect-MCQ streak; Section C 19.5/20 is Biology's best-yet long-question result; Biology dips to 90.3%; overall 93.3% (1880.15/2015)	31 attempts
v36	16 Jul 2026	Physics exam-10 added (64/65, 98.5%, A+); MCQ drops to 11/12 (Q7), ending Physics' flawless 84/84 all-time MCQ record; Section B and Section C both perfect (33/33, 20/20); Physics overtakes Math to become the new top subject at 95.0%; overall 93.5% (1944.15/2080)	32 attempts
v37	17 Jul 2026	Math exam-13 added (58.5/65, 90.0%, A+); MCQ drops to 11/12 (Q5), the 3rd consecutive imperfect MCQ attempt; Section B strong but not perfect (32/33); Section C dips to 15.5/20 on reading/arithmetic slips, an unjustified inequality sign flip, and an unwritten conclusion; Math slips to 94.0%, a dead heat with Chemistry for 2nd; overall 93.4% (2002.65/2145)	33 attempts
v38	22 Jul 2026	Biology exam-12 added (58.3/65, 89.7%, A); MCQ drops to 10/12 (Q9, Q12 both left BLANK — the 4th consecutive imperfect MCQ attempt, and a new failure mode: non-attempt rather than wrong answer); Section B strong not perfect (29/33), driven down by Q2(xi)OR stopping after 1 of 3 required points; Section C excellent (19.3/20); Biology dips to 90.2%; overall 93.3% (2060.95/2210)	34 attempts
