

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 39 | Updated: 22 July 2026 | 34 attempts across 4 subjects

Note on this version (v39): CORRECTS v38, same day. An independent deep-check disputed v38's Biology exam-12-ch1-7 MCQ read of 10/12. Seemab did not fill a bubble panel on that paper — she wrote her twelve MCQ answers as a plain numbered list on the final scan page, and sloped ruled lines caused Q.9 and Q.12 to be misread as blank. Re-read at 400 DPI, all twelve are present and correct against the key: 1.C 2.B 3.C 4.D 5.C 6.D 7.B 8.C 9.C 10.D 11.B 12.C. **Section A corrects to 12/12; total corrects to 60.3/65 (92.8%, Grade A+)**, up from the erroneous 58.3/65 (89.7%, Grade A) — crossing the 90% A+ boundary. Section B (29/33) and Section C (19.3/20) are unchanged. The "MCQ left completely blank" failure mode and the "4th consecutive imperfect MCQ attempt" claims recorded in v38 are both retracted in full — they never happened. Biology's subject average corrects from the wrongly-reported 90.2% to **90.6%** (529.95/585) — actually a slight rise on its pre-exam-12 average of 90.3%, not a dip. Overall average corrects to 93.3% (2062.95/2210); overall MCQ record corrects to 401/408 (98.3%). See Version History below for the full reconciliation.

33	17 Jul 2026	Math	exam-13-ch1-2-4-5-7	58.5/65	90.0%	11/12	32/33	15.5/20	A+
34	22 Jul 2026	Biology	exam-12-ch1-7	60.3/65	92.8%	12/12	29/33	19.3/20	A+

* Chemistry exam-01 Section C shows 21/20 due to a historical bonus mark in the original marking. Biology exam-02ch7 and Math exam-11-ch1-2-4-5-7 were each sat twice; both attempts count separately. Row 34 (Biology exam-12-ch1-7) corrected 2026-07-22 from an initial 58.3/65 (89.7%, A, MCQ 10/12) — see the note above.

Subject Performance Cards

PHYSICS ★ TOP 95.0% | 494.0/520 | 8 exams

MCQ: 95/96 (98.96%) — Unchanged this version; still Seemab's strongest subject, about 1.0 point ahead of Math and Chemistry

MATHEMATICS 94.0% | 550.0/585 | 9 attempts

MCQ: 106/108 (98.1%), 2 errors (exam-07, exam-13) — Unchanged this version; in a dead heat with Chemistry for 2nd place, both trailing Physics

CHEMISTRY 94.0% | 489.0/520 | 8 exams

MCQ: 95/96 (99.0%), 1 error (exam-14) — Unchanged this version; tied with Math at 94.0% for 2nd place

BIOLOGY 90.6% | 529.95/585 | 9 attempts

MCQ: 105/108 (97.2%), 2 errors (exam-01, exam-11) — **Rises this version (90.2%→90.6%)** after exam-12's marking correction (MCQ 10/12→12/12, total 58.3→60.3/65); actually a slight rise on the pre-exam-12 average of 90.3%. Still the weakest subject, but the gap to Chemistry/Math narrows to 3.4 points

MCQ Trend (per attempt, attempts 1 through 34)

7 MCQ errors across 34 attempts (401/408, 98.3%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11, 2 misses), attempt 32 (Physics exam-10), attempt 33 (Math exam-13). Newest: attempt 34 (Biology exam-12) — corrected on deep-check from an initially misread 10/12 to a clean 12/12; Seemab wrote her MCQ answers as a numbered list rather than a bubble panel, and sloped ruled lines caused two answers to be misread as blank. Current streak: 1 consecutive perfect MCQ score.

Confirmed Recurring Pattern: Stopping Before Completing Every Required Part (Biology, 5th occurrence)
Biology exam-12's Q.2(xi)OR asked for three things chewing food for longer achieves (more amylase production; triggering HCl production; activating pepsin). Only the first was written; the answer stopped after one sentence, costing 2 of the 3 marks — the single largest deduction on this paper. This is now a well-established, Biology-specific variant of the file's broader "stopping before finishing every sub-part" family: exam-07 Q.3(ii) (chloroplast omitted), exam-08 (multiple omissions), exam-09 Q.3(ii)OR (stem-cells half never attempted), exam-11 Q.2(vi)OR (lower epidermis half skipped), and now exam-12 Q.2(xi)OR (2 of 3 points missing). Drill fix unchanged: before starting any question with multiple named requirements, list them out first, then tick each one off as it's answered.

New Pattern (2 occurrences, same exam): Correct Facts Stated Without the Causal "Why" Reasoning
Biology exam-12 shows this shape twice: Q.2(viii) correctly named RNA as single-stranded with ribose sugar and uracil, but when asked WHY the nitrogen bases are described as "overhung," simply repeated the term instead of explaining that RNA has no complementary strand for its bases to bond to (-1). Q.2(ix) and Q.3(iv) both correctly quoted pepsin/trypsin's exact optimum pH values and working locations, but never stated the general reasoning that each enzyme's active site is shaped to function best at its own environment's pH (-0.5 and -0.7). In all instances the factual recall is perfect; only the explanatory sentence the question explicitly asks for is missing. Watch for recurrence on future "explain why" style questions in any subject.

Version History (recent entries)

Version	Date	Change	Overall at that point
v34	14 Jul 2026	Chemistry exam-15 added (65/65, 100%, A+); Chemistry's first-ever perfect score, 4th perfect score overall; 3rd perfect MCQ in a row; Chemistry rises to 94.0%, within 0.5 points of Math/Physics; overall 93.5% (1823.75/1950)	30 attempts
v35	16 Jul 2026	Biology exam-11 added (56.4/65, 86.8%, A); MCQ drops to 10/12, ending Biology's 13-exam perfect-MCQ streak; Section C 19.5/20 is Biology's best-yet long-question result; Biology dips to 90.3%; overall 93.3% (1880.15/2015)	31 attempts
v36	16 Jul 2026	Physics exam-10 added (64/65, 98.5%, A+); MCQ drops to 11/12 (Q7), ending Physics' flawless 84/84 all-time MCQ record; Section B and Section C both perfect (33/33, 20/20); Physics overtakes Math to become the new top subject at 95.0%; overall 93.5% (1944.15/2080)	32 attempts
v37	17 Jul 2026	Math exam-13 added (58.5/65, 90.0%, A+); MCQ drops to 11/12 (Q5), the 3rd consecutive imperfect MCQ attempt; Section B strong but not perfect (32/33); Section C dips to 15.5/20 on reading/arithmetic slips, an unjustified inequality sign flip, and an unwritten conclusion; Math slips to 94.0%, a dead heat with Chemistry for 2nd; overall 93.4% (2002.65/2145)	33 attempts
v38	22 Jul 2026	[SUPERSEDED SAME DAY BY v39] Biology exam-12 added at an initially-reported 58.3/65 (89.7%, A); MCQ misread as 10/12 (Q9, Q12 marked blank due to a sloped numbered-list answer format — both were actually correct); Section B 29/33, Section C 19.3/20; Biology reported as dipping to 90.2%; overall reported as 93.3% (2060.95/2210). This version's MCQ figure and "4th consecutive imperfect MCQ" framing were WRONG — see v39.	34 attempts (wrong figures)
v39	22 Jul 2026	CORRECTS v38 same day. Independent deep-check found Biology exam-12's MCQ section was misread; re-verified at 400 DPI, all 12 answers (numbered-list format, not a bubble panel) are correct. Section A corrects 10/12→12/12; total corrects 58.3→60.3/65 (89.7%→92.8%, A→A+), crossing the 90% A+ boundary. Section B/C unchanged. "MCQ left blank" and "4th consecutive imperfect MCQ" claims retracted in full. Biology corrects to 90.6% (529.95/585); overall corrects to 93.3% (2062.95/2210); MCQ record corrects to 401/408 (98.3%).	34 attempts
