

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 41 | Updated: 23 July 2026 | 36 attempts across 4 subjects

Note on this version (v41): Adds Physics exam-11-ch1-6-9, marked 2026-07-23. **60.5/65 (93.1%, Grade A+)**, mid-pack for Physics. MCQ 12/12 - the 3rd consecutive perfect MCQ score across all subjects (after Biology exam-12 and Chemistry exam-16), and Physics' first clean MCQ sheet since exam-09 (exam-10 lost Q7). Section B 29.5/33 - three questions stopped after only part of a multi-part instruction (Q2(vii) gave real-world examples for only two of the three fields, leaving Quantum Mechanics without one; Q2(ix) Pascal's principle without the hydraulic-lift application; Q2(xi)OR geothermal energy without the required advantage-over-fossil-fuels statement), a recurrence of the file-wide "stopping before finishing every part" pattern reappearing in Physics after two clean papers (exam-09, exam-10). Section C 19/20 - the only mark lost was an omitted $v^2=u^2-2gh$ verification step in Q3(i)OR, despite the correct numeric height. Physics dips to **94.8% (554.5/585, 9 exams)** but holds its #1 subject position, 0.3 points ahead of Chemistry (94.5%). Overall average holds at **93.5% (2187.45/2340)**; overall MCQ record rises to **425/432 (98.4%)**. See Version History below for the full reconciliation.

* Chemistry exam-01 Section C shows 21/20 due to a historical bonus mark in the original marking. Biology exam-02-ch7 and Math exam-11-ch1-2-4-5-7 were each sat twice; both attempts count separately. Row 36 (Physics exam-11-ch1-6-9) is the newest attempt, added 2026-07-23.

Subject Performance Cards

PHYSICS ★ TOP

94.8% | 554.5/585 | 9 exams

MCQ: 107/108 (99.07%), 1 error (exam-10) — Dips slightly this version (95.0%→94.8%) after exam-11's 93.1% result, but remains Seemab's strongest subject; gap to Chemistry narrows to 0.3 points

CHEMISTRY

94.5% | 553.0/585 | 9 exams

MCQ: 107/108 (99.07%), 1 error (exam-14) — Unchanged this version; holds clear 2nd place, 0.3 points behind Physics

94.0% | 550.0/585 | 9 attempts

BIOLOGY

90.6% | 529.95/585 | 9 attempts

MCQ Trend (per attempt, attempts 1 through 36)

7 MCQ errors across 36 attempts (425/432=98.4%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11, 2 misses), attempt 32 (Physics exam-10), attempt 33 (Math exam-13). No new miss this version – attempt 36 (Physics exam-11) returned a clean 12/12. Current streak: **3 consecutive perfect MCQ scores** (Biology exam-12, Chemistry exam-16, then Physics exam-11).

Recurring & New Patterns

Biology exam-12's Q.2(xi)OR asked for three things chewing food for longer achieves; only the first was written, costing 2 of the 3 marks. This remains Biology's most persistent recurring weakness (after exam-07, exam-08, exam-09, exam-11). Not present on Chemistry exam-16 in terms of Biology-specific occurrence, but see the Physics box below for a related recurrence in a different subject.

Physics exam-11 shows this pattern three times in Section B alone: Q2(vii) defined Optics, Classical Mechanics and Quantum Mechanics correctly but gave a real-world example for only two of the three fields, leaving Quantum Mechanics without one (–0.5 of 3); Q2(ix) stated Pascal's principle correctly but never applied it to the hydraulic wheelchair lift the question asked about (–2 of 3); Q2(xi)OR explained how geothermal energy generates electricity in full but never stated the required "advantage over fossil fuels" (–1 of 3). A related but distinct lapse appears in Q3(i)OR(c): the correct numeric height (16.2 m) was found but the explicitly-requested $v^2 = u^2 - 2gh$ verification line was never shown (–1 of 2). This breaks a two-paper clean streak – exam-09 and exam-10 were both explicitly free of this pattern – and accounts for all 4.5 marks lost on this paper. The missing Quantum Mechanics example is the third instance of this pattern within this single paper, and a milder version of the same "one half of a paired requirement" lapse was also seen in Chemistry exam-16 (see box below). Drill fix (unchanged from the cross-subject version): before starting an answer, list every named requirement in the question, then tick each one off, including "give an example of each" and "verify using..." lines.

Chemistry exam-16 shows a milder cousin of the pattern above, twice on the same paper: Q2(i) asked for "one example application of EACH" branch but only the polymer-chemistry example was written (-0.5); Q2(vii) asked for the structural property responsible for each of three graphite uses, but the reason was only given for two of them (-0.5). Only one occurrence so far in Chemistry, not yet confirmed recurring.

Version	Date	Change	Overall at that point
v37	17 Jul 2026	Math exam-13 added (58.5/65, 90.0%, A+); MCQ 11/12, 3rd consecutive imperfect MCQ attempt; Section C dips to 15.5/20; Math slips to 94.0%, a dead heat with Chemistry for 2nd; overall 93.4% (2002.65/2145)	33 attempts
v38	22 Jul 2026	[SUPERSEDED SAME DAY BY v39] Biology exam-12 added at an initially-reported 58.3/65 (89.7%, A); MCQ misread as 10/12 – both misses were actually correct on re-check.	34 attempts (wrong figures)
v39	22 Jul 2026	CORRECTS v38 same day. Independent deep-check found Biology exam-12's MCQ section was misread (numbered-list format, not a bubble panel); re-verified at 400 DPI, all 12 correct. Section A corrects 10/12→12/12; total corrects 58.3→60.3/65 (89.7%→92.8%, A→A+). Biology corrects to 90.6% (529.95/585); overall corrects to 93.3% (2062.95/2210); MCQ record corrects to 401/408 (98.3%).	34 attempts
v40	22 Jul 2026	Chemistry exam-16-ch1-9 added (64/65, 98.5%, A+); MCQ 12/12, the 2nd consecutive perfect MCQ score both for Chemistry and overall; Section B 32/33 (two isolated half-mark deductions); Section C a perfect 20/20, Chemistry's 2nd consecutive flawless Section C. Chemistry rises to 94.5% (553.0/585), overtaking Math (94.0%) for clear 2nd place behind Physics (95.0%). Overall rises to 93.5% (2126.95/2275); overall MCQ record rises to 413/420 (98.3%); current MCQ streak: 2.	35 attempts
v41	23 Jul 2026	Physics exam-11-ch1-6-9 added (60.5/65, 93.1%, A+); MCQ 12/12, the 3rd consecutive perfect MCQ score overall and Physics' first clean MCQ sheet since exam-09; Section B 29.5/33 (three questions stopped after only part of a multi-part instruction: Q2(vii) missing the Quantum Mechanics example, Q2(ix) Pascal's principle without the hydraulic-lift application, Q2(xi)OR geothermal without the fossil-fuel advantage); Section C 19/20 (Q3(i)OR's $v^2=u^2-2gh$ verification omitted despite a correct height). Physics dips to 94.8% (554.5/585) but holds #1, 0.3 points ahead of Chemistry (94.5%). Overall holds at 93.5% (2187.45/2340); overall MCQ record rises to 425/432 (98.4%); current MCQ streak: 3.	36 attempts
