Federal Board Class 9 | All Subjects | All Attempts | Version 43 | Updated: 31 July 2026 | 38 attempts across 4 subjects

Note on this version (v43): Adds Biology exam-13-ch1-7, marked 2026-07-31. 64.5/65 (99.2%, Grade A+) — Biology's best-ever score on a fresh, previously-unseen full-syllabus Ch1-7 paper, and its 2nd-highest score of any kind (behind only the 100% re-sit of exam-02). MCQ 12/12, every letter correct, restarting the MCQ streak at 1 after Math exam-14 ended the prior 3-exam run. Section B is a flawless 33/33 — Biology's first perfect Section B on a genuinely new (non-resit) paper. Section C is 19.5/20; the only loss on the whole 65-mark paper is half a mark on Q.3(iv)OR(b) — she gave the correct pepsin/trypsin optimum pH values, locations, and acid/alkaline contrast, but not the deeper active-site-shape reasoning behind why the two values differ — the 2nd occurrence of this exact gap on this exact sub-topic (also exam-12). This is also the first Biology exam in five attempts (since exam-09) with zero instances of the "stopping before completing every required part" pattern — a streak-breaking positive sign, see Recurring & New Patterns below. Biology rises to 91.5% (594.45/650, 10 attempts), narrowing the gap to Math to 2.8 points and to Chemistry to 3.0 points, though still last place. Overall rises to 93.7% (2314.95/2470); overall MCQ record moves to 448/456 (98.2%); current MCQ streak: 1.
