

Seemab: Cumulative Progress Overview

Federal Board Class 9 | All Subjects | All Attempts | Version 45 | Updated: 3 August 2026 | 40 attempts across 4 subjects

Note on this version (v45): Adds Physics exam-12-ch1-6-9, marked 2026-08-03. **56.5/65 (86.9%, Grade A)** – Physics' lowest score since exam-04-ch6 (85.4%). MCQ 10/12, the first time Seemab has lost two MCQs on a single Physics paper (Q.2 confused pressure's unit with density's; Q.3 confused a distance-time graph's gradient with displacement); this breaks the overall MCQ streak (was 2), current streak resets to 0. Section B is 26.5/33: seven of eleven questions scored full marks, but two questions (2(v), 2(xi)OR) show a new failure shape, answering a different/self-invented version of the question rather than the one actually set, costing 5 of the 8.5 marks lost. Section C, by contrast, is a flawless 20/20, including two mid-calculation self-corrections that were caught and fixed before the final answer. One exam-paper data-integrity gap was found (Q.2(x) omits the given force value) and Seemab was given full credit, not penalised. Physics' subject average adjusts to 94.0% (611.0/650, 10 exams), and the subject drops from the #1 spot it held since 16 July 2026 down to #3, now behind Chemistry (94.8%) and Math (94.3%). Overall rises to 93.6% (2434.45/2600); overall MCQ record moves to 470/480 (97.9%); current MCQ streak: 0.

* Chemistry exam-01 Section C shows 21/20 due to a historical bonus mark in the original marking. Biology exam-02-ch7, Math exam-11-ch1-2-4-5-7, and Physics exam-12-ch1-6-9 vs its own history are each single sits; Biology exam-02-ch7 and Math exam-11 were each sat twice, both attempts count separately. Row 40 (Physics exam-12-ch1-6-9) is the newest attempt, added 2026-08-03.

CHEMISTRY ★ TOP	94.8% 616.0/650 10 exams
MCQ: 119/120 (99.2%), 1 error (exam-14). Rises to the #1 subject position this version – not because Chemistry itself changed, but because Physics dropped from 94.8% to 94.0% after exam-12's 86.9%. Chemistry's own figures are unchanged from v44.	

MCQ: 117/120 (97.5%), 3 errors (exam-07, exam-13, exam-14). Unchanged this version; moves up to 2nd place as Physics falls behind it, now trailing Chemistry by 0.5 points and leading Physics by 0.3 points.

MCQ: 117/120 (97.5%), 3 errors total: exam-10 (1) and exam-12 (2, new this version). Drops this version from 94.8% (554.5/585, 9 exams) to 94.0% (611.0/650, 10 exams) after exam-12's 56.5/65 (86.9%), Physics' lowest score since exam-04-ch6. This ends Physics' run at the #1 subject spot, held continuously since 16 July 2026; Physics now sits 3rd, 0.8 points behind Chemistry and 0.3 points behind Math.

MCQ: 117/120 (97.5%), 2 errors (exam-01, exam-11). Unchanged this version; still last place, though the gap to Physics narrows from 3.3 points to 2.5 points now that Physics has slipped.

10 MCQ errors across 40 attempts (470/480, 97.9%). Prior misses: attempt 1 (Biology exam-01), attempt 13 (Math exam-07), attempt 27 (Chemistry exam-14), attempt 31 (Biology exam-11, 2 misses), attempt 32 (Physics exam-10), attempt 33 (Math exam-13), attempt 37 (Math exam-14). This version: attempt 40 (Physics exam-12) loses 2 MCQs (Q.2, Q.3), ending the 2-attempt streak (Biology exam-13, Chemistry exam-17). Current streak: 0.

New Observation (Physics, 1st occurrence, 2026-08-03): Self-invented example substituted for the specific numbers given. Exam-12's Q.2(v)OR asked for the net force of two people pushing a stalled car with 18N and 25N in the same direction, and to name the type of parallel forces. Seemab wrote a fully correct general definition of net force, but then illustrated it with three self-invented numeric examples of her own (10N/6N, 9N/5N, 15N/15N, all opposing forces) instead of ever plugging in the question's own 18N and 25N. This is a different shape from the established "stopping before finishing every sub-part" family: rather than an incomplete answer, this is a complete answer to a question she effectively substituted for the one that was actually set. Cost 2 of 3 marks, tied for the largest deduction on the paper. One occurrence so far, not yet confirmed recurring – watch for a second instance of solving a self-generated version of a numerical rather than the one printed.

New Observation (Physics, 1st occurrence, 2026-08-03): Branches within physics confused with physics applied to other disciplines. Exam-12's Q.2(xi)OR asked for two examples of how physics principles apply to OTHER disciplines (e.g. chemistry, geology), explicitly excluding biophysics as the given example. Seemab instead defined "Thermal Physics" and "Nuclear Physics," both of which are sub-fields within physics itself, not physics being used inside a different subject. None of the three required marking points were met. Cost all 3 marks, tied for the largest deduction on the paper. One occurrence so far – watch for recurrence on any future "interdisciplinary" or "physics applied to X" question, and note this is conceptually distinct from the established incomplete-answer family: it reflects a misunderstanding of what the question category means, not a rushed or partial answer.

RECURRENCE (Physics, 2026-08-03): Two Section A MCQs missed together on a single paper for the first time. Exam-12's Q.2 (pressure's SI unit dimension, $\text{kg}/(\text{m}\cdot\text{s}^2)$, confused with density's kg/m^3) and Q.3 (a distance-time graph's gradient, instantaneous speed, confused with displacement) were both missed on the same paper – the first time Physics has lost 2 MCQs at once (previous misses, exam-10, were single, isolated errors). Physics MCQ moves to 117/120 (97.5%), 3 errors total. Watch whether this reflects a specific gap in dimensional-analysis / graph-interpretation concepts or is coincidental.

Unaffected this version: the Chemistry mid-calculation arithmetic slip and formula subscript slip (exam-17, 2026-08-03), the Biology pepsin/trypsin optimum-pH reasoning gap (2nd occurrence, exam-13, 2026-07-31), and the Math explicit-rounding-instruction slip (exam-14, 2026-07-29) all remain exactly as logged in v44; no new evidence either way this version since no attempt was added in those subjects.

New Strength (Physics, 2026-08-03): exam-12-ch1-6-9 scored a flawless Section C (20/20, 100%), including two mid-calculation self-corrections (Q.2(iii)'s distance calculation, Q.3(iv)'s speed calculation) where an incorrect first approach was crossed out and replaced with the correct method before the final answer was written – a good, deliberate error-catching habit rather than the errors themselves reaching the final answer.

Version	Date	Change	Overall at that point
v42	29 Jul 2026	Math exam-14-ch1-2-4-5-7 added at 63/65 (96.9%, A+); MCQ 11/12, ending a 3-exam perfect MCQ streak; Section C a perfect 20/20. Math rises to 94.3% (613.0/650, 10 attempts). Overall rises to 93.6% (2250.45/2405); MCQ record 436/444 (98.2%).	37 attempts
v43	31 Jul 2026	Biology exam-13-ch1-7 added at 64.5/65 (99.2%, A+), Biology's best-ever fresh full-syllabus score; MCQ 12/12, restarting the streak at 1; Section B a flawless 33/33. Biology rises to 91.5% (594.45/650, 10 attempts). Overall rises to 93.7% (2314.95/2470); MCQ record 448/456 (98.2%).	38 attempts

v44	3 Aug 2026	Chemistry exam-17-ch1-9 added at 63/65 (96.9%, A+, deep-check corrected same day from 64/65), Chemistry's 4th-best score to date; MCQ 12/12, 3rd consecutive perfect MCQ; Section B a flawless 33/33; Section C 18/20 (two Q.3(iv) slips). Chemistry rises to 94.8% (616.0/650, 10 exams), a near-tie with Physics. Overall rises to 93.8% (2377.95/2535); MCQ record 460/468 (98.3%); current MCQ streak: 2.	39 attempts
v45	3 Aug 2026	Physics exam-12-ch1-6-9 added at 56.5/65 (86.9%, Grade A), Physics' lowest score since exam-04-ch6; MCQ 10/12 (first-ever 2-MCQ miss on one Physics paper: Q.2 pressure-unit/density-unit mix-up, Q.3 graph-gradient/displacement mix-up), ending the 2-attempt overall MCQ streak; Section B 26.5/33 (two new-pattern deductions: Q.2(v) solved a self-invented example instead of the set 18N/25N problem, −2; Q.2(xi)OR gave physics sub-branches instead of interdisciplinary examples, −3); Section C a flawless 20/20. Physics falls to 94.0% (611.0/650, 10 exams), losing the #1 subject spot (held since 16 Jul 2026) to Chemistry (94.8%), and dropping behind Math (94.3%) too, now 3rd of 4. Overall rises to 93.6% (2434.45/2600); MCQ record 470/480 (97.9%); current MCQ streak: 0.	40 attempts
