PERFECT PAPERS
100% scores

This version records Seemab's weakest paper to date

Physics exam-13 at **82.3%** is the lowest single score in the whole record (previous low 85.4%, exam-04-ch6), though it remains a Grade A. Physics falls from 94.0% to 93.5% cumulative. Almost all of the shortfall is in Section A, where she scored 9/12 against an 11–12/12 baseline. That MCQ sheet was re-verified at 300 DPI and her answers are genuine. **This version supersedes v46 and v47, both issued earlier the same day.** After Atif and Seemab challenged the paper, every MCQ was audited against the textbook and two were voided in her favour: Q2 offered "9.50 cm²" and "9.5 cm²" as separate options, which are the same number, and Q1 asked her to estimate the height of a door, which is everyday knowledge rather than anything her book teaches. The paper rose from 23.5/31 as first issued to 25.5/31.

The pattern that explains both papers

Both papers were built deliberately from sub-topics that had never been examined before, following the coverage-discipline push. The results split almost perfectly along that line. In Physics, **all three** remaining MCQ misses (the speed of light, line of action, silicon in solar cells) were first-time topics, each verified as explicit textbook content, and every recycled topic was answered correctly. In Chemistry the same held: the one confirmed miss (Moseley, 1913) and the unmarkable item (elements per period) were both first-time periodic-table material, while all nine recycled items were correct. Her written sections stayed strong in both subjects (Chemistry 17/19, Physics 16.5/19). The conclusion is that these scores measure genuinely unpractised ground rather than a decline in ability, and the listed topics are the revision list.

CHEMISTRY ★ TOP — 94.4% | 643.0/681 | 11 exams

Exam	Date	Score	%	Grade	Flag
exam-01-ch1-2	12 Apr 2026	64/65	98.5%	A+	
exam-02-ch3-5	17 Apr 2026	59.5/65	91.5%	A+	
exam-03-ch6	12 May 2026	57.5/65	88.5%	A+

exam-09-ch1-7	6 Jul 2026	61.25/65	94.2%	A+	
exam-11-ch1-7	16 Jul 2026	56.4/65	86.8%	A	
exam-12-ch1-7	22 Jul 2026	60.3/65	92.8%	A+	
exam-13-ch1-7	31 Jul 2026	64.5/65	99.2%	A+	

MCQ: 117/120 (97.5%), 2 errors (exam-01, exam-11). Unchanged this version. The gap to Physics narrows from 2.5 to 1.7 points as Physics falls.

Still holding up

Across 42 attempts the cumulative average is **93.4%**, down only 0.2 points despite the weakest paper on record, because 40 prior results carry the mean. Chemistry keeps the top spot at 94.4% and its Section B on exam-18 was flawless on new material. Mathematics and Biology are untouched this version. Five perfect 100% papers remain on the board.

Open item

Chemistry MCQ 6 on exam-18 was scribbled out and could not be marked. It is currently **unawarded**. If Seemab confirms she intended D, Chemistry exam-18 becomes 28/31 (90.3%, A+), Chemistry cumulative rises to 94.6% and the overall figure to 93.5%. This overview would then be reissued as v49.
