Physics exam-13 was re-marked three times after Atif and Seemab challenged the paper

Seemab questioned a Physics MCQ as arbitrary and she was right. Every MCQ was then audited against both the Student Learning Outcomes and the body text of her own textbook, and **four items were voided in her favour**: Q1 (estimating a door's height, which her book never teaches), Q2 (two numerically identical options), Q4 (SLO B-16 asks her to state that a speed limit exists, not its magnitude) and Q11 (no Unit 6 SLO covers what a solar cell is made of). The paper rose from **23.5/31 (75.8%) as first issued to 27.5/31 (88.7%, Grade A)**, and this version supersedes v46, v47 and v48, all issued the same day.

Only five of the twelve MCQs were properly in syllabus, and Seemab answered all five correctly. Her corrected 11/12 sits at her normal baseline. The original 7/12 measured the quality of the question-setting, not her Physics. Every MCQ in every subject now requires a citation to a page, section or SLO before it can be set.

The pattern that explains both papers

Both papers were built deliberately from sub-topics that had never been examined before, following the coverage-discipline push. The results split almost perfectly along that line. In Physics only one MCQ miss survived the audit (line of action, Unit 4 §4.1), and it too was a first-time topic. In Chemistry the same held: the one confirmed miss (Moseley, 1913) and the unmarkable item (elements per period) were both first-time periodic-table material, while all nine recycled items were correct. Her written sections stayed strong in both subjects (Chemistry 17/19, Physics 16.5/19). The conclusion is that these scores measure genuinely unpractised ground rather than a decline in ability, and the listed topics are the revision list.

CHEMISTRY ★ TOP — 94.4% | 643.0/681 | 11 exams

Exam	Date	Score	%	Grade	Flag
exam-01-ch1-2	12 Apr 2026	64/65	98.5%	A+	
exam-02-ch3-5	17 Apr 2026	59.5/65	91.5%	A+	
exam-03-ch6	12 May 2026	57.5/65	88.5%	A+	
exam-04-ch7	12 Jun 2026	60/65	92.3%	A+	
exam-12-ch1-9	24 Jun 2026	62.5/65	96.2%	A+

exam-12-ch1-6-9	3 Aug 2026	56.5/65	86.9%	A	
exam-13-ch1-6-9	18 Aug 2026	27.5/31	88.7%	A	NEW

MCQ: 128/132 (97.0%), 4 errors (exam-10, exam-12, and 1 new on exam-13; 4 items voided). Stays 3rd but the gap has closed sharply after the SLO audit.

BIOLOGY — 91.5% | 594.45/650 | 10 attempts

Exam	Date	Score	%	Grade	Flag
exam-01-ch1-6	3 Apr 2026	52/65	80.0%	A	
exam-02-ch7 1st	30 Apr 2026	60.5/65	93.1%	A	
exam-02-ch7 re-sit	2 May 2026	65/65	100%	A+	PERFECT
exam-03-ch4	8 Jun 2026	62.5/65	96.2%	A+	
exam-07-ch1-7	23 Jun 2026	57.5/65	88.5%	A	
exam-08-ch1-7	29 Jun 2026	54.5/65	83.8%	A	
exam-09-ch1-7	6 Jul 2026	61.25/65	94.2%	A+	
exam-11-ch1-7	16 Jul 2026	56.4/65	86.8%	A	
exam-12-ch1-7	22 Jul 2026	60.3/65	92.8%	A+	
exam-13-ch1-7	31 Jul 2026	64.5/65	99.2%	A+	

MCQ: 117/120 (97.5%), 2 errors (exam-01, exam-11). Unchanged this version. The gap to Physics narrows from 2.5 to 1.7 points as Physics falls.

Still holding up

Across 42 attempts the cumulative average is **93.4%**, down only 0.2 points despite the weakest paper on record, because 40 prior results carry the mean. Chemistry keeps the top spot at 94.4% and its Section B on exam-18 was flawless on new material. Mathematics and Biology are untouched this version. Five perfect 100% papers remain on the board.

Open item

Chemistry MCQ 6 on exam-18 was scribbled out and could not be marked. It is currently **unawarded**. If Seemab confirms she intended D, Chemistry exam-18 becomes 28/31 (90.3%, A+), Chemistry cumulative rises to 94.6% and the overall figure to 93.5%. This overview would then be reissued as v49.
