PERFECT PAPERS
100% scores

The first two papers built under the new syllabus rule, and both went well

Biology exam-14 and Maths exam-15 were the first papers written after the Physics exam-13 problem, with all 48 MCQs checked one by one against the Student Learning Outcomes in Seemab's own textbooks. **Both scored A+:** Maths **41/43 (95.3%)** and Biology **39/43 (90.7%)**. Every question she got wrong was re-checked after marking and all sit squarely on a stated SLO, so this time the deductions are entirely genuine and the papers measured what they were meant to.

What the four misses actually show

Across 48 MCQs she dropped only four, and each is a narrow definition-boundary slip rather than a gap. In Biology she swapped stem cells for neurons, said meiosis makes two haploid cells instead of four, and called glucose a disaccharide. In Maths her single miss was the sum-of-cubes identity, where she picked the $a^3 - b^3$ form. Notably she then applied the

correct

identity in Section C, so the working knowledge is there. The

meiosis

point cost her twice on the Biology paper, once in the MCQs and once in Section C, and is the single clearest thing to revise.

MCQ: 138/144 (95.8%), 5 errors (exam-01, 11 and 3 new on exam-14). exam-14 scored 39/43 with a flawless Section B. Still 4th, but the gap to Physics is 2.4 points.

Movement this version

Maths climbs to **94.37%** and is now effectively level with Chemistry at 94.42%, a gap of 0.05 points. Biology rises slightly to 91.4% and stays 4th, though its MCQ record improves to 95.8%. The overall average is **93.5% across 44 attempts**, and the lifetime MCQ record stands at **533/552 (96.6%)**.

Open item carried forward

Chemistry exam-18's MCQ 6 remains unmarkable (scribbled out, unawarded). If resolved as D that paper becomes 28/31 and Chemistry moves clear of Maths again. Chemistry exam-18's twelve MCQs have also not yet had the SLO audit that Physics, Biology and Maths have now been through.
