

Chemistry Ch 1.2: Branches of Chemistry

Chapter 1, Nature of Chemistry in Science · kitab ke page 7 se 14 · **12 branches**

Chemistry itni bari hai ke ek insan poori nahin parh sakta. Is liye ise **12 hisson** mein baanta gaya hai. Har hissa ek khaas sawal ka jawab deta hai.

Branch	Kya parhti hai
Organic	Carbon wale maddey (magar carbonates, bicarbonates, oxides aur carbides is mein nahin)
Inorganic	Baqi tamam elements aur compounds, organic ke ilawa
Physical	Maddey ki structure aur tabdeeli ke qawaneen aur theories
Analytical	Tareeqe aur aalaat jin se composition aur properties maloom ki jati hain
Biochemistry	Zinda ajsam ke andar physical aur chemical tabdeeliyan
Environmental	Wo chemical aur zehreela maddey jo mahol ko ganda karte hain
Industrial	Chemical maddon ki bari paimane par tayari
Medicinal	Dawaon aur jismani targets ke darmiyan amal
Polymer	Polymers: nylon, polyethylene, Teflon
Geochemistry	Zameen ki crust ke elements: chattanein, minerals, mitti
Nuclear	Atom ke nucleus ke andar tabdeeliyan
Astrochemistry	Sitaron aur dumdar sitaron mein chemical amal

Do joriyan jo imtihan mein ulti ho jati hain

Organic banam Inorganic: carbon wale organic. Lekin **carbonates, bicarbonates, oxides aur carbides** carbon rakhne ke bawajood **inorganic** hain. Ye istisna yaad rakhein, yehi poochha jata hai.

Physical banam Analytical: Physical **kyun** poochhti hai (qanoon aur theory). Analytical **kitna aur kaunsa** poochhti hai (naap aur pehchan).

Quiz

1. Name any **six** branches of chemistry from your book and write one line on what each studies.
2. Organic chemistry deals with carbon compounds. Name the four carbon containing substances your book **excludes** from it, and say which branch they belong to instead.
