

Chemistry Ch 1.4: Daily Life Applications

Chapter 1, Nature of Chemistry in Science · kitab ke page 7 se 14

Kitab yahan har branch ko **ghar ki ek cheez** se jor deti hai. Ye paanch misalein yaad kar lein, sawal seedha inhi se banta hai.

Branch	Roz marra ki misal
Organic	Dawaein banana (proteins aur enzymes ki madad se)
Inorganic	Lithium ion batteries, jo aap ke mobile mein hain
Analytical	Forensic chemistry: jism ke maaye, haddiyan, reshay aur drugs pehchanna
Physical	Electrochemistry, gaari ki battery ke andar
Environmental	Paani ki safai: sedimentation, filtration, disinfection

Paani ki safai ke teen qadam, tarteeb se

- 1. Sedimentation:** paani ko thehrne dena, bhaari mail neeche baith jata hai.
 - 2. Filtration:** chhan kar baqi zarray nikalna.
 - 3. Disinfection:** keeraay maar dena, aam tor par chlorine se.
- Teenon ka naam aur **tarteeb** dono poochhe ja sakte hain.

Mobile aur gaari ka farq

Dono mein battery hai, magar kitab ne inhein **alag** branches ke saath rakha hai.

Mobile ki Li-ion battery = Inorganic. Gaari ki battery ka electrochemistry = Physical. Ye jori aksar ulta ho jati hai.

Quiz

- Write the everyday application your book gives for **Organic, Inorganic** and **Analytical** chemistry.
- Name the three steps of water purification **in order**, and say which branch of chemistry this belongs to.
