

? Chemistry Ch 1.3: Essential Questions

Chapter 1, Nature of Chemistry in Science · kitab ke page 7 se 14

Is safhay ka poora nuqta

Pichhle safhay par hum ne **12 branches ke naam** yaad kiye. Ab kitab ek aur kaam karti hai: har branch ke saath **ek sawal** jorti hai. Kyun? Kyunke naam bhool sakta hai, magar sawal yaad reh jata hai. Jab aap ko yaad ho ke koi branch **kya poochhti hai**, to us ka kaam khud bakhud yaad aa jata hai.

Branch	Us ka bunyadi sawal
Physical	Ye tabdeeli kyun hoti hai, aur is ka qanoon kya hai?
Organic	Is carbon wale maddey ki banawat kya hai?
Inorganic	Ye element ya compound kaise amal karta hai?
Analytical	Is namoonay mein kya kya hai aur kitna hai?
Biochemistry	Jism ke andar ye amal kaise hota hai?
Environmental	Ye maddah mahol ko kitna nuqsan de raha hai?
Medicinal	Ye dawa jism par asar kaise karti hai?
Polymer	Chhote unit mil kar bara molecule kaise banate hain?
Geochemistry	Zameen ki crust mein ye maddah kahan hai?
Nuclear	Nucleus ke andar kya badal raha hai?
Astronomy	Sitaron mein kaunsa chemical amal chal raha hai?

Is ka faida imtihan mein

Agar sawal ho "kaunsi branch ye kaam karti hai", to seedha naam mat dhoondein. Pehle **sawal** pehchanein. Misal: "ek paani ke namoonay mein lead kitna hai" ye **kitna** wala sawal hai, to jawab **Analytical** hai.

Quiz

1. Write the essential question behind **Analytical**, **Physical** and **Biochemistry**.
2. A scientist is finding out how much lead is in a water sample. Which branch is this, and why?
