

Islamiat: exam-05-bab3b-retest

Per-Exam Overview · a re-test of exam-04 material, two days later
Seemab · Class 9 · PCTB · attempted 28 September 2026

36.5/38 TOTAL	96.1% PERCENTAGE	A+ GRADE	10/10 MCQS	+41pt VS EXAM-04	6 REFERENCES
------------------	---------------------	-------------	---------------	---------------------	-----------------

21/38 to 36.5/38 on the same material, in two days
Exam-04 (26 September) scored 21/38, her lowest paper of the year. This re-test covered the same Bab 3(ب) content and scored 36.5/38, a rise of 41 percentage points. Two independent markers reached the same total.

What changed

Item	exam-04	exam-05	Note
MCQs	6 / 10	10 / 10	All four previously wrong items corrected.
References written	0 on six pages	6, all correct	Two of them were never given to her: Ibn Majah 529 and Bukhari 6167. She found those herself.
Q.3 Andaz e tarbiyat	3.5 / 8	8 / 8	Previously six bare headings. This time the underlying principle, all seven methods, five with the full incident and three with a reference.
Q.4 Ghazwa e Hunain	4.5 / 8	8 / 8	Seventeen of eighteen specifics, including all four spoils-of-war figures and the 40 km she had wrong before.

What was still missing

Item	Lost	Detail
Q.2(iii)	1.5	She read the question correctly this time, unlike exam-04, and closed with the book's own sentence. The five specific things to avoid were not listed.
Reference	½	Sahih Bukhari 4315 for the “Ana an-Nabi la kazib” couplet. The only reference missing from the whole script.

What this paper proved
The gap on exam-04 was never comprehension. It was retrieval of specifics: references, numbers, names. Given two days, a repair note and an audio lesson, she closed it almost completely. That is the clearest evidence this year that the repair loop works, and it is why the same loop was used for Chemistry exam-26.
