------------------	-------------------------	----------------	-----------------------	-----------------------	---------------------

This version banks three papers, and all three are among her strongest
Islamiat exam-05 and Quran exam-03 were marked on 28 and 29 September but their overviews were never posted, so they are added here alongside Chemistry exam-26. The three together are 109.5 out of 114 (96.1%), and they lift the overall from 91.5% to 91.6% while adding 30 MCQs at 30/30.

Subjects, strongest first

Subject	%	Marks	Papers		Movement this round
Physics	93.8%	793.5/846	15		Unchanged this round. Still the top subject, and holds 2 of the 5 perfect papers.
Mathematics	92.7%	810/874	15		Unchanged this round.
Biology	91.9%	790.45/860	15		Unchanged this round.
Chemistry	91.5%	942/1029	18		exam-26 added at 37.5/38, the best paper of the year. Subject average up from 91.3% to 91.5%.
Tarjuma-tul-Quran	88.5%	111.5/126	3		exam-03 added at 35.5/38. Up from 86.4% to 88.5%.
Islamiat	75.0%	120/160	4		exam-05 added at 36.5/38. Up from 68.4% to 75.0%, the largest single move any subject has made.

What these three papers show

- 1. The repair loop works, and it is now proven twice**
Islamiat went 21/38 to 36.5/38 on the same material in two days, after one repair note and one audio lesson. The same method was then used on Chemistry: exam-25's single largest loss was a reversed reaction where she reused a worked example's value, and exam-26 Q.6(v) re-tested exactly that. She scored full marks and re-derived the answer from scratch rather than flipping a sign. Two different subjects, same loop, same result.
- 2. Technique transfers between subjects. Retrieval does not.**
The long-answer structure she built for Islamiat exam-05 (ordered narrative, named specifics, closing conclusion) appeared unprompted in Quran exam-03 Q.3 and scored 8/8. But reference-writing did not travel: six correct references in Islamiat, then one surah name and zero ayah numbers in Quran the next day. Structure is a general skill and moves on its own; tagging is subject-shaped and has to be drilled per subject.
- 3. The open weakness is still specifics, not understanding**
Every mark lost across these three papers came from a missing or mis-stated detail, never from a concept she did not grasp: the five items in Islamiat Q.2(iii), one Bukhari reference, the Hajj half of Quran Q.4, and one dropped "not" in Chemistry Q.4(iii). MCQs across the three papers were 30/30.
- 4. A handwriting risk worth more attention than any single mark**
Chemistry exam-26 revealed that her letter
x

is formed so that it reads as

n

: oxide as "onide", exothermic as "enothermic", carboxyhaemoglobin as "carbonyhamoglobin". It cost nothing here because markers who know her hand could compare it against her own word "Oxygen". A board examiner marking hundreds of unfamiliar scripts will not do that. This is the highest-value correction currently open.

Where the programme stands

Item	Position on 30 September 2026
Attempts to date	70 papers across 6 subjects, 3895 marks attempted.
MCQ record	903 of 988 lifetime (91.4%). The last three papers were 30/30.
Perfect papers	5 (unchanged: none of these three was 100%).
Best paper of 2026	Chemistry exam-26, 37.5/38 (98.7%) , taking the record from Physics exam-15 (97.8%).
Weakest subject	Islamiat at 75.0%, but rising fastest: it gained 6.6 points on this one paper.

Version 73, generated 30 September 2026. Every paper counted here was marked twice, the second marking blind. Carried totals reconcile exactly against version 72 (3457.95 / 3781 across 67 attempts).
