

Seemab's study plan, Class 9

Written 24 September 2026. This is the working plan for finishing the whole Class 9 course. It is kept in the repo so any session, or any person, can pick it up without digging through memory.

The idea in one paragraph

Every evening Seemab gets short notes for two subjects. Each note covers one topic (or a few related ones in the big subjects), runs to 2 pages, or 3 for Maths and Chemistry, and ends with a 3-question quiz whose answers are not printed. She attempts the quiz herself. When a subject's notes are finished she sits one exam for that subject, and that paper is built mostly from the quiz questions she has already practised. The aim is steady daily progress she can enjoy, not pressure.

What is left

270 topics across six subjects, bundled into about 156 notes.

Subject	Topics	Notes	What remains
Maths	106	~40	Units 3, 6, 8, 9, 10, 11
Chemistry	55	~30	Ch 11 to 15
Biology	35	~25	Ch 8, 9, 10
Physics	30	~22	Unit 7 and Unit 8
Islamiat	35	~30	Bab 3(ب), 7 ,6 ,5 ,4 leftovers
Quran	9	9	the 9 remaining surahs, whole surahs only

Full topic lists with book pages and exercise mapping are in the memory files `reference_maths_part_map.md`, `reference_science_part_map.md` and `reference_islamiat_quran_part_map.md`.

The daily shape

- **Two subjects a night, two notes each**, so four notes, Monday to Saturday.
- **Sunday is light**: one subject, two notes. Notes yes, exam never.
- One thinking subject (Maths, Chemistry, Physics) paired with one reading subject (Islamiat, Biology, Quran) wherever the counts allow.
- Notes for the next set go out only after she submits the current attempt.

The notes format

- 2 pages maximum, 3 for Maths and Chemistry.
- One topic per note, even if it fills one page. A topic too big for one sitting is split.
- **English carries the content**: definitions in the book's exact words, technical terms, formulas, equations, table contents, worked examples, and the quiz questions. **Roman Urdu carries the explanation**: why it matters, how to remember it, what a step is doing, the everyday example, the warning about a book error. Islamiat and Quran keep their substance in Urdu script, since those papers are written in Urdu.
- No chapter map, no emoji legend, no dictionary, no score guide, no long introduction.
- Ends with a box headed simply **"Quiz"**: 3 questions, **no answers in the PDF**. The answer key lives in an HTML comment in the source, for marking and for building her paper.
- Book misprints that could cost her marks are flagged in a red box, with the wrong version struck through.

The calendar

43 days, Friday 25 September to Friday 6 November.

Week	Mon	Tue	Wed	Thu	Fri	Sat	Sun (light)
25 Sep					Maths + Islamiat	Chem + Bio	Islamiat
28 Sep	Maths + Bio	Chem + Islamiat	Maths + Bio	Chem + Islamiat	Maths + Bio	Chem + Islamiat	Biology
5 Oct	Maths + Islamiat	Physics + Bio	Maths + Islamiat	Chem + Bio	Maths + Islamiat	Physics + Bio	Islamiat
12 Oct	Maths + Quran	Chem + Islamiat	Maths + Bio	Physics + Islamiat	Maths + Quran	Chem + Islamiat	Biology
19 Oct	Maths + Quran	Physics + Islamiat	Maths + Bio	Chem + Quran	Maths + Islamiat	Physics + Bio	Quran
26 Oct	Maths + Islamiat	Chem + Bio	Physics + Maths	Chem + Physics	Maths + Chem	Physics + Maths	Chemistry
2 Nov	Physics + Maths	Chem + Physics	Maths + Chem	Physics + Maths	Chemistry (last)		

The exams

One per subject, a day or two after that subject's notes finish, never on a Sunday. An exam day is lighter, not heavier: one subject's notes that day plus the paper. Each paper is built quiz-first from the quiz questions in that subject's notes.

Subject	Exam	Covers
Quran	Tue 27 Oct	the 9 surahs
Islamiat	Thu 29 Oct	Bab 3(ب), 7 ,6 ,5 ,4 leftovers
Biology	Sat 31 Oct	Ch 8, 9, 10
Physics	Mon 9 Nov	Unit 7 and Unit 8
Maths	Wed 11 Nov	Units 3, 6, 8, 9, 10, 11
Chemistry	Fri 13 Nov	Ch 11 to 15

Everything finished by **Friday 13 November**. The answer key for any paper is held until she submits, then the result message, report and key go together.

Where things stand on 24 September

Sent to her today: Biology Paper 18 (Chapters 1 to 7, her learned curriculum, 50 marks, key held), plus the Physics Unit 7 Part 7B and Maths Unit 3 Part 3A notes in the final format.

Built and waiting for Friday 25 September:

- [revision/math-u03-part3B-aasan-notes-2026-09-25.pdf](#) (associative and distributive laws)
- [revision/math-u03-part3C-aasan-notes-2026-09-25.pdf](#) (Venn word problems and counting formulas)
- [revision/islamiat-bab3b-husn-e-sulook-aasan-notes-2026-09-25.pdf](#)
- [revision/islamiat-bab3b-andaz-e-tarbiyat-aasan-notes-2026-09-25.pdf](#)

Next Physics build must be Part 7A (density of liquids and of regular solids). Those pages were missing from her scan, and four of Unit 7's six numericals need them.

Open items

- Chemistry Chapters 16 to 19 (Empirical Data, Separation Techniques, Qualitative Analysis, Chromatography): are they in her syllabus? Not yet answered, so they are out of the plan.
- Chemistry page numbers differ by three between the repo's Ch 11 to 14 files and the complete book, and neither has been checked against her physical copy. Until one of her scans settles it, Chemistry notes cite section numbers and headings, not pages.
- Her Physics book runs 2 pages ahead of the online copy. Always cite her numbering.

Book errors found so far

Every one of these is flagged inside the notes so she cannot memorise the wrong thing. The full list, with page references, is in the memory files for each chapter.

- **Physics Unit 7:** Example 7.4 prints 3.22 g/cm^3 where its own data give 2.88; Figure 7.4's "Solids" and "Gases" pictures are swapped; Charles's law is stated backwards on p178; petrol's density contradicts itself between the table and the information box.
- **Physics Unit 8:** the chapter's only numerical prints an answer ten times too large; Example 8.1 says 15 turns but works with 50.
- **Maths Unit 3:** Example 10 defines set C identically to set B; Example 12's arithmetic drops two regions of its own Venn diagram (correct answers 96 and 108, not 91 and 103); Example 13 says "both" where it means "either".
- **Chemistry Ch 10:** three worked examples are printed unbalanced, including the one she lost a mark on.
- **Chemistry Ch 15:** the nucleic acid "deficiency" column lists inherited disorders as if they were dietary diseases.
- **Biology Ch 9:** one exercise question about livestock belongs to a different chapter entirely.

Standing rules worth repeating

- Nothing is ever set outside her own textbook, and every question needs a stated learning outcome behind it.
- Every paper is independently re-solved by a second pass before it is sent.
- Every marked attempt gets a second, blind marking before the score is final.
- Results go out as a Roman Urdu message with each lost mark named by question number, plus the report and the key.
- Nothing is sent to her without being asked for, each time.
