

Seemab — Class 9 Progress Overview

Version 6 · 2026-04-22

Generated after Math Exam-03 (Units 4, 5, 7) attempt on 2026-04-22 — 60.5 / 65 with a 6th consecutive perfect MCQ score

93.7% avg

Across 7 exams, 4 subjects, 455 marks total (426.5 / 455)

MCQ streak extends to 6 consecutive perfect 12/12 · Math remains #1 subject

All Exams — Master Ledger

#	Subject	Chapters	Date	Score	%	MCQ	Grade
1	Biology	Ch 1-6	2026-04-03	52 / 65	80.0%	11/12	A
2	Physics	Ch 1-2	2026-04-07	63.5 / 65	97.7%	12/12	A+
3	Physics	Ch 3-4, 9	2026-04-10	62 / 65	95.4%	12/12	A+
4	Chemistry	Ch 1-2	2026-04-12	64 / 65	98.5%	12/12	A+
5	Chemistry	Ch 3-5	2026-04-17	59.5 / 65	91.5%	12/12	A+
6	Math	Units 1-2	2026-04-18	65 / 65	100%	12/12	A+
7 NEW	Math	Units 4, 5, 7	2026-04-22	60.5 / 65	93.1%	12/12	A+
Cumulative				426.5 / 455	93.7%	83/84	A+

MCQ streak: 6 consecutive perfect 12/12 scores (Phys-01, Phys-02, Chem-01, Chem-02, Math-01, Math-03). Only one miss in 84 total MCQs across all exams.

Subject-by-Subject

Math LEADER · 2 EXAMS

2 exams attempted, avg 96.5%. Exam-01 (100%, Units 1-2) > Exam-03 (93.1%, Units 4, 5, 7). MCQs perfect on both — 24/24. Exam-03 exposed one recurring pattern: **parentheses discipline when squaring grouped symbols**. In Q.2(ii)(or), $(2x)^2$ collapsed to $2x^2$ and $(5y)^2$ to $5y^2$; in Q.2(i)(or)(a), a grouping sign flipped from +1 to -1. The harder Section C questions (chained-substitution factoring, square-root by polynomial long division) both came out clean at 5/5. Still Seemab's strongest subject.

Chemistry

2 exams attempted, avg 95.0%. Exam-01 (98.5%) > Exam-02 (91.5%). All MCQs perfect across both. Exam-02 exposed small areas: periodic trends down a group, Rutherford's 3 defects, and isotope uses. Both attempts A+.

Physics

2 exams attempted, avg 96.5%. Both A+. MCQs 24/24 perfect. Small marks lost on one or two long-answer details per exam. No consistent weakness pattern. No fresh attempt since 2026-04-10.

Biology

1 exam attempted. 80% — Seemab's lowest score so far. Covered Ch 1-6. Early in term. Focus area for the next revision cycle. A re-attempt once Ch 7 (Metabolism) finishes in class would likely lift this significantly.

Cross-Exam Patterns

Strengths (consistent across all 7 exams):

- **MCQ mastery** — $83/84 = 98.8\%$. Six consecutive perfect 12/12s.
- **Definitions, properties, formulas** — recalls and writes them cleanly with textbook precision.
- **Tabular comparisons** — consistently clear and well-organized.
- **Hard question-types don't scare her** — Q.3(i) substitution factoring and Q.3(ii) square-root by long division are two of the nastiest question-types in Math SSC-I. Both scored 5/5 on first attempt.

Watch area — parentheses discipline when squaring:

- In Math Exam-03 Q.2(ii)(or): $(2x)^2 = 4x^2$ became $2x^2$, and $(5y)^2 = 25y^2$ became $5y^2$. The habit to build: when a coefficient is inside parentheses with a variable and gets squared, explicitly write $(2x)(2x) = 4x^2$ for a few weeks until it's automatic.
- Same exam Q.2(i)(or)(a): sign on grouping factor dropped from $+1$ to -1 . Fix: always expand (factor) (factor) mentally to verify it matches the original.
- Exam-03 Q.3(iii): correct solution set, no number line drawn. Marking schemes award a mark for the number-line sketch on inequality questions — worth adding as a habit.

Trend

Average trajectory: 92.9% (v3) $\rightarrow 92.6\%$ (v4) $\rightarrow 93.8\%$ (v5) $\rightarrow$ **93.7% (v6)**. The new math attempt is 93.1% — strong in absolute terms but below the 100% from the previous math exam, so the running average drifts down 0.1% . Still the highest band Seemab has ever held. Math two-exam average of 96.5% is now tied with Physics.

Next watchlist:

- **Biology re-attempt** — still pulling the average down; a second Bio attempt covering the same chapters or Ch 1-8 could reshape the subject profile significantly.
- **Math exam-02 (Ch 3-5)** — still untouched. With exam-01 at 100% and exam-03 at 93.1% , exam-02 is the natural next math paper.
- **Physics re-attempt** — consistent A+ but no fresh attempt since 2026-04-10 (two weeks ago).

Version history: v1 $\rightarrow$ v2 (2026-04-10, 3 exams) $\rightarrow$ v3 (2026-04-12, 4 exams) $\rightarrow$ v4 (2026-04-17, 5 exams) $\rightarrow$ v5 (2026-04-18, 6 exams) $\rightarrow$ **v6 (2026-04-22, 7 exams)**
