

PHYSICS — EXAM-16-CH1-6-9

Per-Exam Overview

Seemab • Class 9 • Federal Board (FBISE) • attempted 16 September 2026

|                  |                     |             |                    |                    |                      |
|------------------|---------------------|-------------|--------------------|--------------------|----------------------|
| 36.5/38<br>TOTAL | 96.1%<br>PERCENTAGE | A+<br>GRADE | 10/10<br>SECTION A | 11/12<br>SECTION B | 15.5/16<br>SECTION C |
|------------------|---------------------|-------------|--------------------|--------------------|----------------------|

WHAT HAPPENED

Her second-best paper of the year, one day after Maths exam-18. **MCQs 10/10**, with every answer numbered as on the paper, all ten present, and every letter matching her own working, which are exactly the two slips that cost her on Maths yesterday. The gradient re-test on a speed-time question held for the second paper running. The four-part car numerical was perfect, units included, and her explanation of why a hydraulic jack uses a liquid was complete.

| Where marks went        | Marks | Kind                                                            |
|-------------------------|-------|-----------------------------------------------------------------|
| 2(i)(a) resultant force | 0.5   | Wrote 15 m instead of 15 N                                      |
| 2(iii)(a) work done     | 0.5   | Substituted the time (8) for the height (4); answer still right |
| 3(ii)(c) show that      | 0.5   | “50 = 50” with no concluding sentence                           |

**None of the 1.5 lost marks is a physics gap.** Two are recording slips and one is the concluding-sentence habit.

POSITION IN THE SUBJECT

Physics now stands at **93.7%** across **14 exams** (757.0 / 808), still her top subject. Lifetime Physics MCQ record **185/196 (94.4%)**.
