Physics exam-16: yesterday’s MCQ slips fixed in one day

Physics exam-16 came in at **36.5/38 (96.1%, A+)**: MCQs 10/10, Section B 11/12, Section C 15.5/16. It is her second-best paper of the year, after Physics exam-15 (97.8%), and it was sat one day after Maths exam-18.

On Maths exam-18 two MCQ marks went on process rather than knowledge: one question was skipped because her answer numbering drifted, and on another she worked out option C and wrote D. The Physics paper’s instructions asked her to number answers as on the paper, count all ten, and check each letter against her working. **She did all three.** Every MCQ was answered, numbered 1 to 10, and on each question with working the letter matches the value she computed. The speed-time gradient re-test also held for a second paper.

The 1.5 marks lost are three half-marks, none of them a physics gap: a resultant force written as 15 m instead of 15 N, the time (8) copied into mgh in place of the height (4) while still reaching the correct 2000 J, and a “show that” ending at “50 = 50” with no concluding sentence. The last is the concluding-sentence habit reappearing after it held on Maths exam-18.

Priorities for the next fortnight

- Units that match the quantity** (force in N, torque in N m) and **copying the right value into the formula.**
- “Show that”, “hence”, “verify”: finish with a written sentence.
- Maths: answer the letter asked for in ordered pairs (a, not the element); name the log laws; state the final value (characteristic, square root without a stray square).
- Keep numbering MCQs as on the paper and checking the letter against the working: it worked here.
- Carried forward from v61: state symbols and “using the data” in Chemistry; the catalyst table; group from configuration; a geometry box for Unit 10; Islamiat Bab 3 Seerat facts; Tarjuma-tul-Quran, the Arabic with the meaning; Biology Q12/Q17 recall.

Standing change from 16 September: a calculator is allowed in all papers, per Atif. The earlier note on Maths exam-18 criticising her calculator use is withdrawn; no mark was ever affected.

Marking method

Physics exam-16 was marked from the 8-page CamScanner scan. The three deciding items were re-read at 300 DPI, and an independent re-verification re-derived all ten MCQ answers from the printed paper, ran a shift guard, checked her textbook for the principle-of-moments wording, and re-marked every written part. Both passes reached 36.5/38 with no disagreement. The v62 figures for the other five subjects are carried forward exactly as published. Built after confirming with both live class-9 sessions that no other attempt was being marked, so this version is complete.

Version history (most recent)

Version	Date	Headline
v61	14 Sep 2026	Chemistry exam-22 added at 42/50; six of nine re-set chemistry errors fixed
v62	15 Sep 2026	Mathematics exam-18 (Version B) added at 32.5/38; seven of ten re-set maths mistakes fixed
v63	16 Sep 2026	Physics exam-16 added at 36.5/38; MCQs 10/10 with the exam-18 numbering and letter slips fixed

Full lineage v1 through v63 is retained, unedited, in seemab-reports/; no prior version is ever overwritten or deleted.
