Biology exam-18: her best Biology score since exam-13, 48/50

Biology exam-18 (50 marks, Chapters 1 to 7, straight revision of already-taught content, no ahead-of-class material) came in at **48/50 (96%, A)**: MCQs 9/10, Section B 23.5/24, Section C 15.5/16. This is her best Biology result since exam-13 (99.2%, 31 July) and a clean step up on the last two papers (94.4% then 94.7%). Three of the four documented re-set weaknesses this paper deliberately re-served all landed correctly: ATP's high-energy bonds (MCQ 9), the photosynthesis equation coefficients (Q.8ii), and comparing the right two things in a meiosis difference table (Q.9i), confirmed a second way by MCQ 4 landing correctly too. Meiosis (Q.9) came back a flawless 8/8, and she caught her own "Mitosis" header slip on Q.9(i) mid-answer, striking it through for "Meiosis II" before giving a single difference; every difference-table pair on the paper (Q.3, Q.5, Q.9i) was correctly filled on both sides, and the paper's tracked missing-conclusion habit did not appear anywhere. The one repeat miss is MCQ 5 (Table 5.2, lymphatic vs immune system), the exact same wrong option she chose on exam-16 Q12, now confirmed as a genuine two-time confusable pair rather than a one-off. The only other losses are half a mark on Q.7(ii) for never stating which respiration stage uses oxygen (all four stages were correctly named, in order), and half a mark on Q.8(iii) for leaving NADP without its final H.

Priorities for the next fortnight

- Lymphatic vs immune system, Table 5.2.** Wrong on exam-16 Q12 and again on exam-18 MCQ 5, now a confirmed recurring confusable pair, not a one-off: the lymphatic system's role is "maintain tissue fluid homeostasis"; the immune system's is "removing pathogens, fighting infections and helping in healing".
- Answer every sub-part of a multi-part question, not just the list.** Biology exam-18 Q.7(ii) named all four respiration stages correctly and in order, but never went on to state that oxygen is used in the electron transport chain, even though the question explicitly asks for it.
- Add the final H to NADPH.** Biology exam-18 Q.8(iii) wrote NADP clearly but never added the H that makes it NADPH, the actual light-reaction product.
- Probability (Unit 11, section 11.3): P(E) = favourable/total, complementary events (1 – P), expected frequency = n × p. New from Maths exam-19: left entirely blank, the largest single loss on that paper.
- Points of concurrency in a right-angled triangle: right bisectors (meet at the mid point of the hypotenuse) versus altitudes (meet at the vertex of the right angle). New from Maths exam-19 MCQ 5.
- Re-derive bond-energy direction when a reaction is reversed from a worked example, rather than reusing the example's numbers. Chemistry exam-25's main miss (Q.7).
- Carried forward: Maths ordered pairs and log-law names (exam-18); Islamiat exam-02's unapplied +1 correction on Q15 (still 30/46 pending Atif's go-ahead).

exam-18-ch1-7	24 Sep 2026	48/50	96%	A	NEW

MCQ: 196/208 (94.2%). Exam-18 scored 9/10: the one miss, MCQ 5 (lymphatic vs immune system, Table 5.2), repeats exam-16 Q12 exactly and is now a confirmed two-time confusable pair.

exam-02-bab1-2-3-4-6-7	13 Sep 2026	30/46	65.2%	B	CONFIRMED FINAL
exam-03-bab1-2-3-4-6-7	18 Sep 2026	32.5/38	85.5%	A	

MCQ: 26/40 (65.0%). Unchanged since v65. Exam-02 still carries the verified +1 correction on its Q15 (40 km), pending Atif's go-ahead: not applied here; it is carried forward at 30/46 unchanged, as instructed.

Marking method. Biology exam-18 was marked from a 7-page CamScanner scan, read at 150 DPI with targeted crops up to 400 to 600% zoom on every equation, chemical formula and the handwritten MCQ answer list, which she wrote as a plain numbered list on the final page rather than in a bubble grid. All three sections and every sub-part were present, in order, with no gaps between questions across all seven pages. A blind second marking independently confirmed 48/50 with zero key errors and no mark moves. One naming item is recorded as a resolved judgement call in the attempt report: she named the second respiration stage "link reaction" rather than the book's "formation of Acetyl CoA" in Q.7(ii), credited in full since the question constrains the order of the stages, not the vocabulary. The v69 figures for the other five subjects are carried forward exactly as published.

Version history (most recent)

Version	Date	Headline
v68	22 Sep 2026	Chemistry exam-25 added; second Chapter 10 paper, corrected in place same day from 47 to 46.5/50 (93.0%, A) after a deep check found a missing unit in Q.9(ii); Chapter 10 alone now 35/35 (100%)
v69	23 Sep 2026	Mathematics exam-19 added, 43/50 (86.0%, A); Unit 6, not yet taught in class, scored a perfect 11/11; the probability question (first ever tested) was left entirely blank, the paper's single largest loss
v70	24 Sep 2026	Biology exam-18 added, 48/50 (96%, A), her best Biology score since exam-13; corrected in place same day after a blind second marking confirmed the score with two wording fixes (Q.8iii reads NADP, not ambiguous; Q.7ii "link reaction" keeps full credit); four of five re-tested weaknesses fixed, incl. MCQ 4; the one repeat miss (MCQ 5, lymphatic vs immune) is now a confirmed two-time confusable pair

Full lineage v1 through v70 is retained in seemab-reports/, with v70 corrected in place the same day it was built (never sent before the fix); no prior version is ever overwritten or deleted. Islamiat exam-02 still carries the unapplied +1 correction on its Q15.
