Physics exam-17: 36.5/38 on a unit she was never taught

Physics exam-17 (38 marks, Unit 7 Density and Temperature Parts 7A and 7B at 27 marks, with 11 marks of revision from Unit 6 Work and Energy and Unit 3 Dynamics-I) came in at 36.5/38 (96.1%, A): MCQs 10/10, Section B 11.5/12, Section C 15/16. It ties Physics exam-16 as her best Physics result of the year, and it is the more impressive of the two, because Unit 7 Parts 7A and 7B had not been covered in class. On that unseen material she scored 25.5 out of 27, and the revision half was a clean 11 out of 11.

This is the first paper built deliberately around her Aasan Notes. All six quiz questions from the Part 7A and Part 7B notes appeared on it, worth 13 of the 27 new marks, and she took all 13. That closes the loop the whole programme was designed around: notes, then the quiz inside the notes, then the same questions on the paper.

Five tracked weaknesses were re-served and every one of them landed. The three Physics errors from her OPF First Term paper (half mass and double speed, the dam reservoir energy, and treating a weight as a mass) all came back correct, and on the first of those she caught herself mid-answer and corrected her own letter. Units were carried on every numerical answer, with zero unit deductions. The missing-conclusion habit, which had shown up across six earlier papers, did not appear: she wrote the closing sentence on both questions that asked for one and labelled it each time.

Only two marks were lost. On Q.5(B)(vi) she worked the density out to 19300 kg/m3 and then named the metal as tungsten. The question said to use Table 7.1 of her book, which lists gold at 19300 and does not contain tungsten at all. Her physics is not wrong, tungsten genuinely sits near that value, but she answered from memory rather than opening the table. On Q.4(i) she wrote "flowing" for the arrangement of a gas, which describes movement instead, and fails to separate a gas from a liquid. Both losses are the same instinct from two angles. A blind second marker worked the script without seeing the first pass and returned the identical total and the identical two deductions.

PRIORITIES FOR THE NEXT FORTNIGHT

1. When a question names a table, open that table. New from Physics exam-17 Q.5(vi): she reached the right number and then named a metal from memory that is not in Table 7.1. The single largest loss on the paper and the easiest to fix.

2. Arrangement is not movement. Physics exam-17 Q.4(i): "flowing" was given for how gas particles are arranged. Arrangement asks how far apart and how ordered; the word needed was random.

3. Lymphatic vs immune system, Table 5.2. Wrong on Biology exam-16 Q12 and again on exam-18 MCQ 5, a confirmed recurring confusable pair: the lymphatic system maintains tissue fluid homeostasis; the immune system removes pathogens, fights infections and helps healing.

4. Answer every sub-part of a multi-part question, not just the list. Biology exam-18 Q.7(ii) named all four respiration stages in order but never stated that oxygen is used in the electron transport chain.

5. Add the final H to NADPH. Biology exam-18 Q.8(iii).

6. Probability (Unit 11, section 11.3): P(E) = favourable/total, complementary events, expected frequency = n times p. From Maths exam-19, left entirely blank, the largest single loss on that paper.

7. Points of concurrency in a right-angled triangle: right bisectors meet at the mid point of the hypotenuse, altitudes meet at the vertex of the right angle. From Maths exam-19 MCQ 5.

8. Re-derive bond-energy direction when a reaction is reversed, rather than reusing a worked example's numbers. Chemistry exam-25 Q.7.

9. Carried forward: Maths ordered pairs and log-law names (exam-18); Islamiat exam-02's unapplied +1 correction on Q15.

VERSION HISTORY (MOST RECENT)		
Version	Date	Headline
v69	23 Sep 2026	Mathematics exam-19 added, 43/50 (86.0%, A); Unit 6, not yet taught in class, scored a perfect 11/11; the probability question (first ever tested) was left entirely blank, the paper's single largest loss
v70	24 Sep 2026	Biology exam-18 added, 48/50 (96%, A), her best Biology score since exam-13; corrected in place same day after a blind second marking confirmed the score with two wording fixes; four of five re-tested weaknesses fixed
v71	25 Sep 2026	Physics exam-17 added, 36.5/38 (96.1%, A); Unit 7 Parts 7A and 7B were never taught in class and still scored 25.5/27; MCQs 10/10 and revision 11/11 both perfect; all six Aasan Notes quiz questions on the paper (13 marks) banked in full; the six-paper missing-conclusion habit did not appear

Full lineage v1 through v71 is retained in seemab-reports/; no prior version is ever overwritten or deleted. Islamiat exam-02 still carries the unapplied +1 correction on its Q15.

END
