

Chemistry — Chapter 7: Electrochemistry

SINGLE ATTEMPT

Per-Exam Overview | exam-04-ch7 | Attempt: 12 June 2026 | SSC-I (9th Grade)

60 / 65

TOTAL SCORE

92.3%

PERCENTAGE

A+

GRADE

12 / 12

MCQ SCORE

29 / 33

SECTION B

19 / 20

SECTION C

Section Performance

MCQs		100%
Section B		87.9%
Section C		95.0%
Overall		92.3%

Section	Max	Scored	%	Note
A — MCQs	12	12	100%	Perfect — all 12 correct
B — Short (11 Qs)	33	29	87.9%	4 marks dropped across 5 questions
C — Long (4 Qs)	20	19	95.0%	1 mark dropped in Q.3(ii) definitions
Total	65	60	92.3%	Grade: A+

Subject Performance Card

Strengths in this exam

- Perfect MCQ (12/12) including the KMnO_4 colour change and magnesium-for-ships questions
- Corrosion topic — full marks in Q.2(ix) and Q.3(iv); both half-reactions correct with state symbols and region labels
- Oxidation state calculations — 8 out of 9 calculations flawless (Q.2(iii), Q.2(iv), Q.3(i), Q.3(iii))
- Section C long answers structured with headings — Section C average 95%
- Activity 7.2 answered completely: observation, balanced equation with states, both agents identified
- All 11 Section B questions answered — no skipped parts

Priority revision targets

- Electron direction (NEW):** Oxidizing agents GAIN electrons (they are reduced). Reducing agents LOSE electrons (they are oxidized). Write this as a flashcard and drill before the next exam.
- Sub-part order discipline:** Re-read (a)(b)(c)(d) before each sub-answer. Cost 1 mark in Q.2(vii).
- Process steps for prevention methods:** Galvanizing = ZnCl_2 bath then zinc bath. Electroplating = object is cathode, plating metal is anode.
- Explicit oxidation state statement:** When question says "state the oxidation state," write it even if implied by the name.
- Final arithmetic check:** $1-4=-3$ not -5 . One second check on the last line.

Chemistry Progression (All 4 Exams)

Exam	Date	Topic	MCQ	Sec B	Sec C	Total	%
exam-01-ch1-2	12 Apr 2026	Ch 1-2 Nature & Matter	12/12	31/33	21/20	64/65	98.5%
exam-02-ch3-5	17 Apr 2026	Ch 3-5 Structure & Bonding	12/12	28/33	19.5/20	59.5/65	91.5%
exam-03-ch6	12 May 2026	Ch 6 Stoichiometry	12/12	27.5/33	18/20	57.5/65	88.5%
exam-04-ch7 ►	12 Jun 2026	Ch 7 Electrochemistry	12/12	29/33	19/20	60/65	92.3%

Chemistry 4-exam average: **92.7%** (241/260). Rebound of +3.8 percentage points from the previous attempt. MCQ is perfect across all four Chemistry exams (48/48 total).
