

Seemab Atif — Cumulative Progress Overview

Class 9 | FBISE Federal Board | Academic Year 2025-26

Version 10 | Updated 2026-05-18

NEW ATTEMPT ADDED: Physics exam-03-ch5 (2026-05-18) — PERFECT SCORE 65/65 (100%)

Physics subject average rises to 98.3%. Overall average rises to 88.7%. Third perfect score total.

All Attempts — Chronological

#	Date	Subject	Exam	MCQ	Sec B	Sec C	Total	%	Grade
1	2026-04-03	Biology	exam-01-ch1-6	11/12	27/33	14/20	52/65	80.0%	A
2	2026-04-07	Physics	exam-01-ch1-2	12/12	32.5/33	19/20	63.5/65	97.7%	A+
3	2026-04-10	Physics	exam-02-ch3-4-9	12/12	32/33	18/20	62/65	95.4%	A+
4	2026-04-12	Chemistry	exam-01-ch1-2	12/12	32/33	20/20	64/65	98.5%	A+
5	2026-04-17	Chemistry	exam-02-ch3-5	12/12	32/33	15.5/20	59.5/65	91.5%	A+
6	2026-04-18	Math	exam-01-ch1-2	12/12	33/33	20/20	65/65	100%	A+ PERF
7	2026-04-22	Math	exam-03-ch4-5-7	12/12	32/33	16.5/20	60.5/65	93.1%	A+
8	2026-04-30	Biology	exam-02-ch7	12/12	30.5/33	18/20	60.5/65	93.1%	A
9	2026-05-02	Biology	exam-02-ch7 (re-sit)	12/12	33/33	20/20	65/65	100%	A+ PERF
10	2026-05-12	Chemistry	exam-03-ch6	12/12	32/33	13.5/20	57.5/65	88.5%	A+
11	2026-05-18	Physics	exam-03-ch5	12/12	33/33	20/20	65/65	100%	A+ PERF

Overall: 634.5/715 marks (88.7%). Highest: 100% (three-way tie: Math-01, Bio-02 re-sit, Phys-03). Lowest: 80.0% (Bio-01 — Q.5 Section C not attempted). Cumulative MCQ: 143/144 (99.3%) — only error ever was MCQ 5 on Bio exam-01 (Apr 2026).

Subject Performance

MATHEMATICS

96.5%

2 exams: 100%, 93.1%
Best: Math exam-01 (100%)

PHYSICS

98.3%

3 exams: 97.7%, 95.4%, 100%
Best: Phys exam-03 (100%) NEW

CHEMISTRY

92.8%

3 exams: 98.5%, 91.5%, 88.5%
Best: Chem exam-01 (98.5%)

BIOLOGY

90.0%

2 exams: 80.0%, 100%
Best: Bio exam-02 re-sit (100%)

Physics now leads all subjects at 98.3%. The trajectory across three exams (97.7% → 95.4% → 100%) shows a decisive bounce-back after a slight dip in exam-02. Chemistry at 92.8% is the weakest subject and has a downward trend (98.5% → 91.5% → 88.5%) — Section C ionic equations are the identified root cause.

Consistent Strengths (across all 11 attempts)

MCQ mastery: 143/144 all time, 132 consecutive correct

The single error was MCQ-5 on Bio exam-01 in April. Since then, 11 consecutive perfect 12/12 MCQ scores — 132 correct answers in a row. This includes Q6 "most elastic = steel" (not rubber) on this exam, which is a common trap.

Calculation discipline: unit conversions always shown

cm to m, km to m, Pa to kPa/MPa — explicitly written every time across Physics, Chemistry, and Biology numericals. Never skips the intermediate step.

Definition precision: textbook-grade wording consistently

Across Physics-01, Physics-02, Physics-03, Chemistry-01/02/03, Biology-02: definitions match the mark scheme wording. Not paraphrasing — precise language.

Perfect Section B in 4 of 11 attempts, including two consecutive

Bio-02 re-sit (33/33), Math-01 (33/33), Phys-03 (33/33). Section B is clearly the strongest section type. The trend for Section B is upward overall.

Three perfect scores — all in different subjects

Math-01 (April), Bio-02 re-sit (May), Physics-03 (May). Demonstrates the discipline can be applied across subjects, not just in one area.

Recurring Weaknesses — Revision Priorities

PRIORITY 1 — Chemistry Section C ionic equations (3 exams flagged)

Ion charges missing (H instead of H⁺), state symbols missing ((aq) omitted), net ionic products wrong (MgH₂ instead of Mg²⁺ + H₂↑). This has appeared in Chem-01, Chem-02, and Chem-03. Drill: write 5 complete ionic equations from scratch daily, including all superscripts and (aq)/(g) labels.

PRIORITY 2 — Chemistry: atom count = moles × NA, not molar mass × NA (3 exams)

Three consecutive chemistry exams have shown the molar mass M being used where moles should appear. Chain to internalize: mass ÷ M = moles; moles × NA = atoms. The M is consumed in step 1 and never appears again.

PRIORITY 3 — Chemistry Section C empirical formula work

Non-integer subscripts treated as valid (aspirin: 4.5:4:2). Must expand to elemental atom count then divide by GCD until all subscripts are integers.

WATCH — Math parentheses when squaring (1 exam)

(2x)² = 4x², not 2x². Only seen in Math-03. No recurrence yet, but watch on next math exam.

RESOLVED — Biology mechanism depth and organelle naming

Bio-01 lacked mechanism explanations. Bio-02 re-sit (May) corrected all flagged patterns: allosteric site named, ETC on inner mitochondrial membrane stated, lock-and-key vs induced-fit mechanistic detail included. Resolved — monitor for regression.

Report Version History

Version	Date	Exams Included	Key Change
v1	2026-04-10	1	Initial — Bio exam-01
v2	2026-04-10	3	Added Physics exam-01 and exam-02
v3	2026-04-12	4	Added Chemistry exam-01
v4	2026-04-17	5	Added Chemistry exam-02
v5	2026-04-18	6	Added Math exam-01 (first perfect score)
v6	2026-04-22	7	Added Math exam-03
v7	2026-04-30	8	Added Biology exam-02 (Apr)
v8	2026-05-02	9	Added Biology exam-02 re-sit (2nd perfect score)
v9	2026-05-12	10	Added Chemistry exam-03 (corrected rubric from 46 to 65)
v10	2026-05-18	11	Added Physics exam-03-ch5 (3rd perfect score); Physics avg rises to 98.3%; overall avg rises to 88.7%
