Math exam-04 (today)

MCQ Record Update: 148/156 overall (94.9%). The 11-consecutive-perfect-12/12 streak has ended — Math exam-04 scored 5/12. Prior streak: Phys-01, Phys-02, Chem-01, Chem-02, Math-01, Math-03, Bio-02 (Apr), Bio-02 (May), Chem-03, Phys-03, then today's 5/12. The errors were all definitional (LCM scope, algebraic fraction condition, perfect cube vs sum-of-cubes) rather than computational. A review of Ch4 key-facts will restore this.

Subject Averages (all attempts)

Physics: 97.7% + 95.4% + 100% = 98.3% avg. | Chemistry: 98.5% + 91.5% + 88.5% = 92.8% avg. | Math: 100% + 93.1%

+ 78.5% = 90.5% avg (down from 96.5%). | Biology: 80.0% (exam-01) + 100% (exam-02 re-sit) = 90.0% [using best sit per paper]; 3 sittings total. | *Bio average uses the best attempt per paper per standard practice.

Strengths and Patterns

Consistent strengths

- MCQ mastery across all subjects (broken only today on definitional MCQs)
- Section C (long questions) — avg 90%+ across all exams
- Three perfect 65/65 scores across three subjects
- Algebraic manipulation: substitution factoring, HCF/LCM by factoring
- Algebraic fractions: sign changes, simplification, cancellation
- Mass-mole interconversions (Chemistry — fully automatic)
- Enzyme inhibition and metabolism mechanisms (Biology)
- Pressure, Hooke's law, Pascal's principle (Physics)

Recurring weakness patterns

- **MCQ definitional recall (NEW, Math Ch4):** LCM scope, algebraic fraction condition, perfect cube vs sum-of-cubes — first MCQ drop across all subjects
- Binomial cube recognition in complex factoring (Math)
- Verification step in $LCM \times HCF = P \times Q$ (arithmetic errors)
- Ionic notation (Chemistry): charges and state symbols still missing in equations
- Atom count calculation: moles $\times$ NA, not molar mass $\times$ NA (Chemistry)
- Elemental molar mass: C = 12 not 14 (Chemistry)

Trajectory note for parents: The overall average has moved from 88.7% (v10) to 87.9% (v11) — a minor dip driven entirely by today's MCQ result. Section B (84.8%) and Section C (90.0%) on today's paper are consistent with Seemab's established capability. The specific error pattern (definitional MCQs on LCM, HCF, algebraic fractions) is targetable in one focused study session using the answer key explanations for each MCQ. Physics remains the strongest subject at 98.3%, with three exams all above 95%.
