Bio exam-01 (3 Apr)

MCQ Record: 166/168 (98.8%). The 11-exam consecutive perfect MCQ streak (exams 2 through 12) ended on this attempt: Seemab chose D (gradient = -1) for Q2 about the gradient of a horizontal line; the correct answer is C (gradient = 0). Overall MCQ performance remains exceptional at 98.8% across 168 questions. The streak of 11 consecutive 12/12 scores stands as the record.

Subject Averages (all attempts)

Physics: (97.7 + 95.4 + 100) / 3 = 98.3%. | Math: (100 + 93.1 + 87.7 + 98.5) / 4 = 94.9% (up from 93.6% on 3 exams). | Chemistry: (98.5 + 91.5 + 88.5) / 3 = 92.8%. | Biology: best attempt per paper: 80.0% (exam-01) + 100% (exam-02 re-sit) = 90.0%. *Bio uses best attempt per paper.

CONSISTENT STRENGTHS

- MCQ mastery: 166/168 (98.8%); 11 consecutive perfect 12/12 scores (exams 2-12)
- Section C (long questions): perfect 20/20 in 12 of 13 attempts
- Three perfect 65/65 scores across three different subjects
- Geometric proof methods: slopes, collinearity, parallelism, perpendicularity all reliable
- All six standard forms of the straight line (new this exam)
- Family-of-lines technique (new this exam)
- Mass-mole interconversions (Chemistry — fully automatic)
- Enzyme inhibition and metabolism mechanisms (Biology)
- Verification discipline: spontaneously checks answers (180° angle sum, collinearity)

RECURRING WEAKNESS PATTERNS

- Gradient of horizontal line (Math, new):** $\tan 0^\circ = 0$, not -1. One MCQ error today.
- Sum-of-cubes middle term (Math):** middle term -ab confused with -2ab; seen in exam-03 and exam-04
- Sophie Germain identity completion (Math):** sets up correctly but stops before applying the final difference-of-squares step
- Sign discipline in bracket expansion (Math):** -k(a-b) sign errors in exam-04
- LCM of three trinomials (Math):** middle-term split for negative constant incomplete
- Ionic notation (Chemistry):** charges and state symbols missing in equations
- Atom count chain (Chemistry):** molar mass reused in step 2 of mass-moles-atoms

Trajectory note for parents: This is Seemab's second-highest score ever (64/65, 98.5%), behind only the three perfect exams. After a dip to 87.7% in the previous Math exam (Chapter 4 factorization), the bounce-back to 98.5% on Chapter 8 geometry is strong. Every short question and every long question was answered correctly — the only mark dropped was one MCQ on the gradient of a horizontal line, which is a single-concept gap easily fixed with a flashcard. The

Math subject average rises to 94.9% across 4 exams, now comfortably the second-best subject behind Physics (98.3%). Section B is now back to 33/33 after the formula-precision deductions seen in exams 3 and 4 — that recovery is the most significant positive signal in this result.
