

Seemab: Har Ghalat MCQ, Poori List

Saare papers, April se September 2026 · 9 September 2026

Ye list Seemab ke saare papers se banayi gayi hai. April se ab tak jo bhi MCQ ghalat hua, wo yahan mojud hai, subject ke hisaab se.

Lifetime MCQ record: **693 sahih out of 748 (92.6%)**. Yani sirf 55 ghaltiyan poore saal mein. Ye bohot acha record hai.

Lekin asli faida in 55 ko dekhne mein hai, na ke un 693 ko. Neeche jo bhi **gulabi rang** mein hai, wo ek "confusing pair" hai, yani do milti julti cheezon mein ghalti. Yehi sab se zyada number kharab karti hain.

CHEMISTRY — 222/246 (90.2%), 24 ghaltiyan

Paper	Score	Q	Kya ghalti hui
exam-19	17/24	Q13	Metallic bond ki jagah ionic bond ka matlab likha
exam-19		Q6	Shell energy
exam-19		Q14	Electropositive ka matlab
exam-19		Q15	Melting points (structure ke hisaab se)
exam-19		Q16	Noble gas configuration
exam-19		Q20	$\text{Ca}(\text{NO}_3)_2$ ka formula
exam-19		Q24	Activation energy
exam-20	49/60	Q21, Q30	Group rule aur period rule mila diya, ek hi paper mein DO BAAR
exam-20		Q55, Q57	Oxidizing aur reducing agent ulta kar diya, ek hi paper mein DO BAAR
exam-20		Ch3 (2)	Proton emission; Rutherford force balance
exam-20		Ch6 (2)	Formula aur naming (numericals sab sahih thay)
exam-20		Ch8 (2)	Energetics ke do aakhri hissay
exam-21	25/30	Q9	Quantum model ki jagah Bohr ka purana model chuna
exam-21		Q13	Electron affinity ki jagah ionization energy ka matlab likha
exam-21		Q14	Haber process ka catalyst: Nickel likha, sahih Iron hai
exam-21		Q19	Diamond ko simple molecular kaha, sahih giant covalent hai
exam-21		Q27	Catalyst ΔH badalta hai likha. Catalyst ΔH kabhi nahi badalta.

Note: exam-18 ke Q5 aur Q6 syllabus se bahar thay, is liye wo void kar diye gaye. Wo ghalti nahi thi.

MATHS — 166/178 (93.3%), 12 ghaltiyan

Paper	Score	Q	Kya ghalti hui
exam-07	11/12	Q2	Ufqi (horizontal) line ka gradient: D chuna, sahih C tha ($m = 0$)
exam-14	11/12	Q12	$(-x, y)$ ka quadrant: Second ki jagah First likha
exam-15	23/24	Q13	$a^3 + b^3$ ke liye $a^3 - b^3$ wala form chuna
exam-16	20/24	Q11	Sum of cubes ka sign pattern, lagatar doosre paper mein ghalat
exam-16		Q18	Additive property ki jagah transitive property likha
exam-16		Q22	Sawal a ke liye tha, tum ne element ke liye hal kiya
exam-16		Q5	Babylonian system base 60 hai
exam-17	6/10	Q2	$\sqrt{48} + \sqrt{27}$ ko $\sqrt{75}$ samjha. Pehle simple karo phir jama karo.
exam-17		Q7	$ -8 $ ko -8 parha. Bars bracket nahi, zero se faasla hain.
exam-17		Q8	$[-1, 3]$ ki jagah $[1, 3]$ likha, minus gir gaya
exam-17		Q10	Letter ki jagah coordinate likha aur upar se kaat diya, parha nahi gaya

PHYSICS — 146/156 (93.6%), 10 ghaltiyan

Paper	Score	Q	Kya ghalti hui
exam-12	10/12	Q2	Pressure ka unit
exam-12		Q3	Graph ka gradient
exam-13	11/12	Q9	Aik genuine miss (baqi 4 SLO audit ke baad void huay)
exam-14	20/24	Q5	Speed-time graph ka area. Area = distance, gradient = acceleration.
exam-14		Q12	Mass naapne ka aala (physical balance vs spring balance)
exam-14		Q21	Non-renewable resource kaun sa hai
exam-14		Q23	Perpetual motion

Physics ka sab se purana masla: **gradient aur area ka farq**. Ye kai papers mein aa chuka hai.

BIOLOGY — 159/168 (94.6%), 9 ghaltiyan

Paper	Score	Q	Kya ghalti hui
exam-14	21/24	Q9	Stem cells
exam-14		Q13	Meiosis se kya banta hai
exam-14		Q19	Glucose
exam-15	21/24	Q2	Scientific law ki definition thi, tum ne theory chuna
exam-15		Q14	Animal cytokinesis ka sawal tha, tum ne plant ka jawab (phragmoplast) diya
exam-15		Q19	"Hydrophobic" chahiye tha, tum ne "saturated" chuna (wo fatty acid ke liye hai)
exam-01	—	—	Purines (do ring) aur pyrimidines (ek ring) mila diye

Sab se ahem baat: 55 mein se taqreeban 30 ghaltiyan "confusing pairs" hain.

Yani do aisi cheezein jo aapas mein milti julti hain, aur ghalti se doosri chun li gayi. Misal:

- gradient aur area • oxidizing aur reducing agent • group aur period rule
- electron affinity aur ionization energy • Bohr aur quantum model
- giant covalent aur simple molecular • theory aur law • plant aur animal cytokinesis
- a^3+b^3 aur a^3-b^3 • purines aur pyrimidines

Do baatein khaas taur par notice karo:

1. Chemistry exam-20 mein **ek hi ghalti do baar** hui, do martaba. Jab ghalti dohrayi jaye to iska matlab lapervahi nahi, balke wo cheez dimagh mein ulthi baithi hui hai.
2. Sum of cubes ka sign pattern **lagatar do papers** mein ghalat hua (exam-15 aur exam-16).

Isi liye "Confusing Pairs" wali sheet banayi gayi hai. Wo zaroor hal karna.

Aage kya karna hai

#	Kaam
1	Ye list sambhal kar rakho. Har naye paper ke baad jo MCQ ghalat ho, usay is list mein likh lo.
2	Har hafte purani ghaltiyan dobara dekho, sirf naya kaam mat karo.
3	Confusing pairs ko jori bana kar yaad karo, alag alag nahi.
4	MCQ karte waqt rough kaam kaghaz par likho. Maths mein 60% thay, Chemistry mein likh kar 83% ho gaye.
5	Exam mein: pehle do galat options kaat do, phir bachi hui do ka aapas mein muqabla karo. Tumhari ghalti hamesha "milta julta" option hoti hai.

Seemab, 92.6% lifetime MCQ record bohot acha hai. Ye list tumhein neecha dikhane ke liye nahi hai, balke is liye hai ke baqi 7.4% bhi tumhare haath mein aa jaye. Sab ghaltiyan yahan ek jagah likhi hain taake koi cheez chupi na rahe.
