

Total Score 57.5/65 Corrected from 58/65	Percentage 88.5% Corrected from 89.2%	Grade A	MCQ Score 12/12 Perfect	Bio Subject Avg 91.5% All 5 attempts
--	---	------------	-------------------------------	--

Correction issued 2026-06-23: this attempt was re-verified against the answer key. Q.3(ii) corrected from 3.5/5 to 3/5 because Chloroplast (worth 2 marks) was entirely omitted; exam total corrected from 58/65 to 57.5/65 (88.5%). The cumulative overall average is also corrected to 93.3%; earlier progress overviews carried an understated running total. Progress overview v17 is retained unchanged per the additive-only rule.

Section Breakdown		
Section A (MCQs)		12/12
Section B (Short Qs)		27.5/33
Section C (Long Qs)		18/20

Section B — Question-by-Question Summary				
Q	Variant	Topic	Score	Key deduction
2(i)	Main	Define Biology; three major fields with examples	2/3	No formal definition written (1 mark)
2(ii)	OR	Ronald Ross and Malaria proof	3/3	Full marks
2(iii)	OR	Three domains of Carl Woese	3/3	Full marks
2(iv)	OR	SER vs RER comparison	3/3	Full marks
2(v)	Main	Significance of mitosis (3 headings)	2/3	Wound healing omitted (1 mark)
2(vi)	OR	Benign vs malignant tumour; metastasis	3/3	Full marks
2(vii)	Main	Tissues forming the stomach	3/3	Full marks
2(viii)	Main	Three types of plant tissue	2.5/3	Ground tissue function incomplete (0.5 mark)
2(ix)	—	Energy yield of biomolecules; functions of lipids	0/3	Not attempted (3 marks). Confirmed genuine skip, not a missing page.
2(x)	Main	Three types of RNA and specific roles	3/3	Full marks
2(xi)	OR	Factors affecting enzymes; temperature effect	3/3	Full marks

Section C — Question-by-Question Summary				
Q	Variant	Topic	Score	Key deduction
3(i)	OR	Advantages of classification; complete taxonomic hierarchy (human)	5/5	Full marks
3(ii)	Main	Structure & function of Mitochondria, Chloroplast, Golgi apparatus	3/5	Chloroplast entirely omitted (2 marks)
3(iii)	OR	Central dogma; transcription and translation with all molecules	5/5	Full marks
3(iv)	OR	ATP as energy currency; components; ATP-ADP cycle; high-energy bonds	5/5	Full marks

Strengths on this paper	Areas needing attention
- Perfect MCQs (12/12) across all 7 chapters - Ronald Ross / Malaria: date, pathogen, vector, Nobel Prize — all correct - Three domains of Carl Woese: all characteristics, basis (rRNA) — outstanding depth - Central dogma (3(iii) OR): all molecules named, both processes fully described - ATP structure and cycle (3(iv) OR): all four elements addressed - Taxonomic hierarchy: complete Domain to Species for human - Mitochondria description: cristae, matrix, own DNA, 36 ATP - Enzyme denaturation mechanism explained with atomic-level detail	Q.2(ix) skipped (3 marks): Energy yield of biomolecules and lipid functions. Count required questions before starting Section B. Stopping early pattern (returning): Q.2(v) wound healing missing; Q.3(ii) Chloroplast missing. Two separate instances on one paper. Re-read the full question before moving on. Definition missing in Q.2(i): Fields listed but no Biology definition written. Multi-part questions: address every stated component. Ground tissue incomplete (0.5 marks): Support and storage functions not mentioned alongside photosynthesis.

Biology Subject Performance Card (all attempts)	
exam-01 (ch1-6)	80.0%
exam-02 (Apr)	93.1%
exam-02 (re-sit)	100.0%
exam-03-ch4	96.2%
exam-07-ch1-7	88.5%

Biology Exam History							
Exam	Date	MCQ	Sec B	Sec C	Total	%	Grade
exam-01-ch1-6	3 Apr 2026	11/12	22/33	19/20	52/65	80.0%	A
exam-02-ch7 (Apr)	30 Apr 2026	12/12	22.5/33	26/30*	60.5/65	93.1%	A
exam-02-ch7 (re-sit)	2 May 2026	12/12	33/33	20/20	65/65	100.0%	A+
exam-03-ch4	8 Jun 2026	12/12	31/33	19.5/20	62.5/65	96.2%	A+

exam-07-ch1-7	23 Jun 2026	12/12	27.5/33	18/20	57.5/65	88.5%	A
---------------	-------------	-------	---------	-------	---------	-------	---

* exam-02-ch7 April had a different Section C structure; figures are approximate for comparison purposes.

Biology subject average (all 5 attempts): **91.5%** | Total marks across 5 Biology attempts: 297.5/325
