

Physics — Unit 6: Work and Energy

Seemab | Class 9 | FBISE | Exam: exam-04-ch6 | Attempt: 2026-06-22
Per-exam overview | Physics subject report | 4th Physics exam

SINGLE ATTEMPT

55.5/65

TOTAL SCORE

85.4%

PERCENTAGE

A

GRADE

12/12

MCQS (PERFECT)

29/33

SECTION B

14.5/20

SECTION C

Section Breakdown

Section	Marks Available	Marks Scored	%	Notes
A — MCQs	12	12	100%	All 12 correct — perfect
B — Short Answers	33	29	87.9%	9 of 11 full marks; Q.2(vi) 1/3, Q.2(viii) 1/3
C — Long Answers	20	14.5	72.5%	Q.3(i) 4.5, Q.3(ii) 3.5, Q.3(iii) 3.5, Q.3(iv) 3.0
Total	65	55.5	85.4%	Grade A

Section A — MCQs	12/12 (100%)
Section B — Short Answers	29/33 (87.9%)
Section C — Long Answers	14.5/20 (72.5%)
Overall	55.5/65 (85.4%)

This Attempt — Strengths and Areas for Revision

STRENGTHS

- + Perfect MCQs (12/12) — conceptual traps including zero-work, horsepower, efficiency limit all handled correctly
- + Numerical calculation fluency: all 6 calculation OR questions in Section B scored 3/3
- + Work-energy theorem stated precisely; verification step ($294+98=392$ J) shown
- + Fossil fuels topic complete: formation, three types, balanced combustion equation in both Q.2(vii) and Q.3(iv)
- + Tesla engine power: scientific notation arithmetic correct throughout
- + Energy conservation applied confidently in 4 separate numericals

AREAS FOR REVISION

- ! **Renewable definition (urgent):** swapped in both Q.2(vi) and Q.3(iv). Renewable = replenished rapidly by nature. Non-renewable = millions of years to form.
- ! **Zero-work conditions:** parallel force and displacement gives MAXIMUM work. Zero work = displacement is zero OR force perpendicular to displacement.
- ! **Solar radiation definition:** it is electromagnetic energy from the Sun, not the conversion process itself.
- ! **Always write advantage and disadvantage** when the question explicitly asks (Q.2(viii) missed both).
- ! **Prove $1\text{kWh}=3.6\times10^9\text{J}$:** $E=1000\text{W}\times3600\text{s}$ — show the arithmetic when "prove" appears.
- ! **Long answers — finish all sub-parts:** Q.3(ii) skipped electric cars; Q.3(iv) skipped environmental problems and reasons to shift. Re-read the question after writing to check all bullets are covered.

Physics Exam History (All 4 Attempts)

#	Date	Exam	Chapters	MCQ	Sec B	Sec C	Total	%	Grade
1	7 Apr 2026	exam-01-ch1-2	Ch 1-2	12/12	32.5/33	19/20	63.5/65	97.7%	A+
2	10 Apr 2026	exam-02-ch3-4-9	Ch 3,4,9	12/12	31/33	19/20	62/65	95.4%	A+
3	18 May 2026	exam-03-ch5	Ch 5	12/12	33/33	20/20	65/65	100%	A+
4	22 Jun 2026	exam-04-ch6	Ch 6	12/12	29/33	14.5/20	55.5/65	85.4%	A

Physics subject average (4 exams): $246/260 = 94.6\%$. MCQ record in Physics: 48/48 (100%) across all four exams — perfect in every single MCQ.

Note: This is the lowest Physics score so far (85.4%), driven primarily by Section C (72.5%). The Section C deficit reflects a pattern of long answers stopping before all sub-parts are complete. Previous Physics exams scored 95.4%–100% in Section C.
