Recurring Weakness Patterns (active)

Stopping early before all required sub-parts (3rd consecutive exam)

Seen in: Chem exam-02, Bio exam-01, Physics exam-04-ch6 (Q.3(ii) and Q.3(iv)), and now Bio exam-07-ch1-7 (Q.2(v) wound healing; Q.3(ii) Chloroplast). Two instances on the same paper this time. Cost: 2.5 marks on this exam alone. Drill fix: after writing each answer, physically re-read the full question text and tick every listed sub-part before moving on.

Skipping a required Section B question

Bio exam-07-ch1-7 Q.2(ix) (energy yield of lipids/carbs/proteins + functions of lipids) was not attempted. Cost: 3 marks — the single largest deduction on this paper. The paper requires 11 of 11 questions (no "attempt any" rule applies here). Before starting Section B, count the available questions and mark off each one as you go.

Renewable vs non-renewable energy definitions swapped (Physics)

Physics exam-04-ch6: two separate questions (Q.2(vi) and Q.3(iv)) showed the definitions placed in the wrong column. Flash card: Renewable = replenished rapidly by natural processes. Non-renewable = formed over millions of years, finite. The distinguishing word is RATE of replacement.

Definition missing when listing sub-points (Biology)

Bio exam-07-ch1-7 Q.2(i): three fields of Biology listed correctly but the formal definition of Biology itself was omitted (1 mark). When a question says "Define X. State Y..." — always write the definition first, then proceed to the list.
