Key Milestones

- First 100%: Math exam-01 (18 Apr 2026)
- Second 100%: Bio exam-02 re-sit (2 May 2026)
- Third 100%: Physics exam-03 (18 May 2026)
- MCQ streak record: 11 consecutive 12/12 (exams 2–12)
- Chemistry MCQ: 48/48 across 4 exams (100%)
- Physics MCQ: 48/48 across 4 exams (100%)
- Current run: 4 consecutive 12/12 (exams 14–17)

Top Revision Priorities (as of 2026-06-23)

- Stop skipping Section B questions (Biology):** Bio exam-07 lost 3 marks by not attempting Q.2(ix) on lipid energy yield and functions. Before starting Section B, count available questions and confirm 11 will be answered.
- Stop leaving the last sub-part of multi-part questions unanswered:** Active across Biology (wound healing in Q.2(v); Chloroplast in Q.3(ii)) and Physics (Q.3 endings in exam-04). Three exams in a row have shown this. Re-read every question after writing and tick each sub-part.
- Renewable vs non-renewable energy definitions (Physics Ch 6):** Swapped on two separate questions in Physics exam-04. Flash card: Renewable = natural, rapid replenishment. Non-renewable = formed over millions of years, finite, irreplaceable in human timescale.
- Ground tissue functions (Biology Ch 5):** Only photosynthesis was cited; support and water/sugar storage also required.
- Always write the formal definition before listing sub-points (Biology):** Q.2(i) listed fields of Biology without first defining "Biology" as a branch of science. One mark lost.
